As of the most recent prospectus, the net expense ratio for the Advisor shares was 1.62%, for Institutional shares was 1.37% and for Investor shares was 1.47%, and was applicable to investors at least until March 31, 2020, so that the Total Annual Fund Operating Expenses (exclusive of front-end or contingent deferred loads; brokerage fees and commissions; acquired fund fees and expenses; borrowing costs (such as interest and dividend expense on securities sold short); payments, if any, under a Rule 12b-1 Distribution Plan or Shareholder Servicing Plan; expenses paid with securities lending expense offset credits; taxes; and extraordinary expenses (such as litigation)) do not exceed 0.99% of average daily net assets for each of the Advisor Class, Investor Class and Institutional Class shares.

FUND DESCRIPTION

The investment objective of the Horizon Active Income Fund is income.

The fund's flexible strategy aims to improve the risk/return characteristics of traditional fixed income strategies by utilizing non-traditional asset classes. This active fund may use high yield bonds, MLPs, preferred stocks, bank loans and foreign bonds, in addition to securities typically found in traditional fixed income portfolios. Accordingly, the fund combines the goal and strategic purpose of a Core Bond Fund with the flexibility of a Non-Traditional Bond Fund.

ASPECTS OF THIS ACTIVE FUND

Strategy: A single investment in the Horizon Active Income Fund accesses a large universe of global investment opportunities. Horizon considers a broad selection of ETFs in order to access a wide range of market, style, sector, country and currency exposures.

Management: This fund is actively managed, using flexible asset allocation techniques to navigate volatile market swings.

Risk: For Horizon, managing risk is just as important as investment selection. Assembling portfolios of diversified asset classes and having the ability to make timely adjustments in allocation weightings may help mitigate market risk.

Inception date for the table above is per share class; all returns greater than one year are presented as annualized returns. Performance data quoted represents past performance; past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the fund may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by calling 866-371-2399.

Footnotes

All share classes are "no-load" shares; there are no fees or commissions related to the sales of these shares, but other fees and expenses do apply to a continued investment in the Fund and are described in the Fund's current Prospectus, which should be carefully reviewed before investing. Shares of the Fund are presently offered through financial intermediaries who have been approved by the Fund. Please refer to your financial representative for detailed information on purchasing or redeeming Investor shares.

The Barclays U.S. Aggregate Bond Index is an unmanaged index that is generally considered representative of the U.S. Investment Grade Bond market.

The Morningstar US OE Intermediate-Term Bond Category contains portfolios that invest primarily in corporate and other investment-grade U.S. fixed-income issues and typically have durations of 3.5 to 6.0 years.

You cannot invest directly in an index and unmanaged index returns do not reflect any fees, expenses or sales charge.

Disclosures

Mutual fund investing involves risk. Principal loss is possible. In addition to the costs, fees, and expenses involved in investing in ETFs, ETFs are subject to additional risks including the risks that the market price of the shares may trade at a discount to its net asset value ("NAV"), an active secondary trading market may not develop or be maintained, or trading may be halted by the exchange in which they trade, which may impact a Fund's ability to sell its shares. The Fund may invest in foreign securities which involve greater volatility and political, economic and currency risks and differences in accounting methods. These risks are greater in emerging markets. Investments in debt securities typically decrease in value when interest rates rise. This risk is usually greater for longer-term debt securities. Investment by the Fund in lower-rated and non-rated securities presents a greater risk of loss to principal and interest than higher-rated securities. Investments in Real Estate Investment Trusts (REITs) involve additional risks such as declines in the value of real estate and increased susceptibility to adverse economic or regulatory developments. MLPs are subject to certain risks inherent in the structure of MLPs, including complex tax structure risks, the limited ability for election or removal of management, limited voting rights, potential dependence on parent companies or sponsors for revenues to satisfy obligations, and potential conflicts of interest between partners, members and affiliates. Investments in mortgage backed securities (MBS) include additional risks that investors should be aware of such as credit risk, prepayment risk, possible illiquidity and default, as well as increased susceptibility to adverse economic developments. The Fund may also use options, which have the risks of unlimited losses of the underlying holdings due to unanticipated market movements and failure to correctly predict the direction of securities prices, interest rates and currency exchange rates. The investment in options is not suitable for all investors.

The fund's investment objective, risks, charges and expenses must be considered carefully before investing. The summary and statutory prospectuses contains this and other important information about the investment company, and they may be obtained by calling 866-371-2399 or visiting www.horizonmutualfunds.com. Read them carefully before investing.
