SUMMARY SECTIONS

Horizon U.S. Defensive Small/Mid Cap Fund

Investment Objective

The investment objective of the Horizon U.S. Defensive Small/Mid Cap Fund (the “Defensive Small/Mid Cap Fund”) is capital appreciation.

Fees and Expenses of the Defensive Small/Mid Cap Fund

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Defensive Small/Mid Cap Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below.**

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	Advisor Class	Institutional Class	Investor Class
Management Fees	0.80%	0.80%	0.80%
Distribution and/or Service (12b-1) Fees	0.25%	None	0.10%
Other Expenses ⁽¹⁾	0.20%	0.20%	0.20%
Total Annual Fund Operating Expenses	1.25%	1.00%	1.10%
Fee Waiver and Expense Reimbursements ⁽²⁾	(0.01)%	(0.01)%	(0.01)%
Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursements/Recoupment	1.24%	0.99%	1.09%

(1) “Other Expenses” are estimated for the current fiscal year for the Institutional Class.

(2) The Defensive Small/Mid Cap Fund’s investment adviser, Horizon Investments, LLC (“Horizon”), has contractually agreed to waive its fees and reimburse expenses of the Defensive Small/Mid Cap Fund, at least until December 31, 2023, so that the Total Annual Fund Operating Expenses After Fee Waivers and Reimbursement (exclusive of front-end or contingent deferred loads; brokerage fees and commissions; acquired fund fees and expenses; borrowing costs (such as interest and dividend expense on securities sold short); payments, if any, under a Rule 12b-1 Distribution Plan; expenses paid with securities lending expense offset credits; taxes; and extraordinary expenses (such as litigation)) do not exceed 0.99% of average daily net assets for each of the Advisor Class, Investor Class and Institutional Class shares; provided, however, that any fees waived and expenses reimbursed are subject to possible recoupment by Horizon, within 36 months after such fees have been waived or expenses reimbursed, if such recoupment can be achieved without exceeding the lower of the expense limit in place at the time of the waiver or reimbursement and the expense limit in place at the time of recoupment. This expense waiver agreement can only be terminated by a majority of the Fund’s trustees that are not “interested persons” of the Trust (as defined under the Investment Company Act of 1940, as amended) or a majority of the outstanding shares of the Fund.

Example: This Example is intended to help you compare the cost of investing in the Defensive Small/Mid Cap Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Defensive Small/Mid Cap Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Defensive Small/Mid Cap Fund’s operating expenses remain the same (taking into account the contractual expense limitation). The fee waiver/expense reimbursement arrangement discussed in the table above is reflected only through December 31, 2023. Although your actual costs may be higher or lower, based upon these assumptions your costs would be:

	1 Year	3 Years
Advisor Class	\$126	\$396
Institutional Class	\$101	\$317
Investor Class	\$111	\$349

Portfolio Turnover

The Defensive Small/Mid Cap Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Defensive Small/Mid Cap Fund’s performance. No portfolio turnover rate is provided for the Defensive Small/Mid Cap Fund because the Defensive Small/Mid Cap Fund had not commenced operations as of the date of this Prospectus.

Principal Investment Strategies of the Defensive Small/Mid Cap Fund

The Defensive Small/Mid Cap Fund seeks to achieve its investment objective by investing primarily in small and mid-cap U.S. equity securities. In addition, the Fund employs defensive techniques, including strategic portfolio positioning, to achieve lower overall volatility as compared to the market generally.

Under normal circumstances, the Defensive Small/Mid Cap Fund will invest not less than 80% of the value of its net assets in the equity securities of small and mid-cap U.S. issuers. The Defensive Small/Mid Cap Fund's investment adviser, Horizon Investments, LLC ("Horizon"), generally considers small and mid-cap issuers to be those that are within the range of the S&P 600 and S&P 400 indices, respectively, when purchased.

Horizon selects and weights securities using a flexible approach that combines active management and quantitative models to allocate the Fund's portfolio between issuers, sectors and/or factors (e.g., growth, value, momentum, quality, size and volatility) that Horizon believes offer the opportunity for the highest projected return for a given amount of risk. Horizon assesses projected return and expected risk by diversifying across stocks that have one or more high quality underlying fundamentals, such as: high profitability and stable earnings; low price variability; low fundamental valuation measures; and high recent price trends. Horizon may add or modify these characteristics as economic conditions change. In constructing the portfolio, Horizon may consider industry and position constraints to ensure sufficient diversification, as determined by Horizon. The Defensive Small/Mid-Cap Fund expects equity securities with the foregoing characteristics in aggregate to have a defensive tilt, and therefore the Defensive Small/Mid-Cap Fund may lag the performance of traditional U.S. Small/Mid-Cap equity markets in strong up markets, but is designed to outperform when U.S. Small/Mid-Cap equity markets decline. The Defensive Small/Mid Cap Fund will primarily invest in common stocks and public real estate investment trusts ("REITs"). Depending on market conditions, the Defensive Small/Mid Cap Fund may at times focus its investments in particular sectors or areas of the economy. The Defensive Small/Mid-Cap Fund expects to engage in frequent buying and selling of securities to achieve its investment objective.

Options. The Defensive Small/Mid Cap Fund may also buy or write put and call options for investment purposes, to hedge other investments, or to generate option premiums for the Fund. The Defensive Small/Mid Cap Fund's options investments may involve "covered" positions where the Fund may write a call option on an underlying position to generate income. The Defensive Small/Mid Cap Fund may involve a "collateralized" strategy more generally, where the Defensive Small/Mid Cap Fund may write put options on a security whose value is collateralized by cash ("cash-secured puts") or otherwise collateralized by the Fund's securities.

The Defensive Small/Mid Cap Fund's option strategies may involve options combinations, such as spreads, straddles and collars. In "spread" transactions, the Defensive Small/Mid Cap Fund buys and writes a put or buys and writes a call on the same underlying instrument with the options having different exercise prices, expiration dates, or both. When the Defensive Small/Mid Cap Fund engages in spread transactions, it seeks to profit from differences in the option premiums paid and received and in the market prices of the related options positions when they are closed out or sold. In "straddles," the Defensive Small/Mid Cap Fund purchases a put option and a call option or writes a put option and a call option on the same instrument with the same expiration date and the same exercise price. A "collar" position combines a put option purchased by the Defensive Small/Mid Cap Fund (the right of the Defensive Small/Mid Cap Fund to sell a specific security within a specified period) with a call option that is written by the Defensive Small/Mid Cap Fund (the right of the counterparty to buy the same security) in a single instrument, and the Defensive Small/Mid Cap Fund's right to sell the security is typically set at a price that is below the counterparty's right to buy the security. Thus, the combined position "collars" the performance of the underlying security, providing protection from depreciation below the price specified in the put option, and allowing for participation in any appreciation up to the price specified by the call option. In each case, the premium received for writing an option offsets, in part, the premium paid to purchase the corresponding option; however, downside protection may be limited as compared to just owning a single option. There is no limit on the number or size of the options transactions in which the Defensive Small/Mid Cap Fund may engage.

Principal Risks of the Defensive Small/Mid Cap Fund

Many factors affect the Defensive Small/Mid Cap Fund's performance. The Defensive Small/Mid Cap Fund's share price changes daily based on changes in market conditions in response to economic, political and financial developments. The direction and extent of those price changes will be affected by the financial condition, industry and economic sector, and geographic location of the securities in which the Defensive Small/Mid Cap Fund invests. The Defensive Small/Mid Cap Fund is not federally insured or guaranteed by any government agency. You may lose money by investing in the Defensive Small/Mid Cap Fund.

Management Risk. The ability of the Defensive Small/Mid Cap Fund to meet its investment objective is directly related to the allocation of the Defensive Small/Mid Cap Fund's assets. Horizon may allocate the Defensive Small/Mid Cap Fund's investments so as to under-emphasize or over-emphasize investments at the wrong times or under the wrong market conditions, in which case the Defensive Small/Mid Cap Fund's value may be adversely affected. Horizon's analysis of industries, companies, economic trends, the relative attractiveness of different securities or other matters could be wrong and may not produce desired results.

Market Risk. Investments in securities in general are subject to market risks that may cause their prices to fluctuate over time. The Defensive Small/Mid Cap Fund's investments may decline in value due to factors affecting securities markets generally, or particular countries, segments, economic sectors, industries or companies within those markets. The value of a security may decline due to general economic and market conditions that are not specifically related to a particular issuer. Markets may, in response to governmental actions or intervention, economic or market developments, trade disputes, the spread of infectious illness or other public health issues, geopolitical factors or other external factors, experience periods of high volatility and reduced liquidity, and, in extreme cases, may lead to restrictions and halts. During those periods, the Fund may experience high levels of shareholder redemptions, and may have to sell securities at times when the Fund would otherwise not do so, potentially at unfavorable prices. Certain securities may be difficult to value during such periods.

Domestic Strategy Risk. Because the Defensive Small/Mid Cap Fund will invest primarily in securities of U.S. issuers, the Defensive Small/Mid Cap Fund is subject to the risk that certain changes in the U.S. economy, such as when the U.S. economy weakens or when its financial markets decline, may have an adverse effect on the securities to which the Fund has exposure, and the Fund will be restricted in its ability to allocate its investments to the securities of non-U.S. issuers.

Smaller and Medium Issuer Risk. Small and medium capitalization companies may be more vulnerable than larger, more established organizations to adverse business or economic developments. In addition, small and medium capitalization companies may be particularly affected by interest rate increases, as they may find it more difficult to borrow money to continue or expand operations, or may have difficulty in repaying any loans.

Real Estate Risk. Real estate values rise and fall in response to a variety of factors, including local, regional and national economic conditions, interest rates and tax considerations. REIT performance depends on the types and locations of the rental properties it owns and on how well it manages those properties.

Options Risk. The value of an option will fluctuate in response to changes in the value of the underlying security or index. In addition, investments in options involve risks different from, or possibly greater than, the risks associated with investing directly in securities, including leverage risk, tracking risk and, in the case of over the counter options, counterparty default risk. Option positions may expire worthless exposing the Defensive Small/Mid Cap Fund to potentially significant losses. If the Defensive Small/Mid Cap Fund writes options, it may receive a premium that is small relative to the loss realized in the event of adverse changes in the value of the underlying instruments. When the Defensive Small/Mid Cap Fund utilizes options spreads, collars or other combinations, the premium received for writing the call option offsets, in part, the premium paid to purchase the corresponding put option; however, the Defensive Small/Mid Cap Fund's participation in gains above the price of the call option are forfeited in return for receiving the call option premium.

Quantitative Model Risk. The Defensive Small/Mid Cap Fund's strategy relies heavily on quantitative models and the analysis of specific metrics to construct the Defensive Small/Mid Cap Fund's portfolio. The impact of these metrics on a security's performance can be difficult to predict, and securities that previously possessed certain desirable quantitative characteristics may not continue to demonstrate those same characteristics in the future. In addition, relying on quantitative models entails the risk that the models themselves may be limited or incorrect, that the data on which the models rely may be incorrect or incomplete, and that Horizon may not be successful in selecting companies for investment or determining the weighting of particular securities in the Defensive Small/Mid Cap Fund's portfolio. Any of these factors could cause the Defensive Small/Mid Cap Fund to underperform funds with similar strategies that do not select investments based on quantitative analysis.

Turnover Risk. As a result of its trading strategies, the Defensive Small/Mid Cap Fund may sell portfolio securities without regard to the length of time they have been held and will likely have a higher portfolio turnover rate than other mutual funds. Since portfolio turnover may involve paying brokerage commissions and other transaction costs, higher turnover generally results in additional expenses, which may lower the performance of the Defensive Small/Mid Cap Fund, and may also result in the realization of short-term capital gains. The Defensive Small/Mid Cap Fund must generally distribute realized capital gains to shareholders, increasing the Defensive Small/Mid Cap Fund's taxable distributions. High rates of portfolio turnover in a given year would likely result in short-term capital gains, which are taxed to shareholders at ordinary income tax rates.

Equity Securities Risk. The prices of equity securities are volatile and may fluctuate in response to many factors. The market price of equity securities owned by the Defensive Small/Mid Cap Fund may go down, sometimes rapidly or unpredictably. Equity securities may decline in value due to factors affecting equity securities markets generally, particular industries represented by those markets, or factors directly related to a specific company, such as decisions made by its management.

Focus Risk. To the extent that the Defensive Small/Mid Cap Fund focuses its investments in particular industries, asset classes or sectors of the economy, any market price movements, regulatory or technological changes, or economic conditions affecting companies in those industries, asset classes or sectors may have a significant impact on the Defensive Small/Mid Cap Fund's performance.

Operational and Technology Risk. Cyber-attacks, disruptions, or failures that affect the Defensive Small/Mid Cap Fund's service providers or counterparties, issuers of securities held by the Defensive Small/Mid Cap Fund, or other market participants may adversely affect the Defensive Small/Mid Cap Fund and its shareholders, including by causing losses for the Defensive Small/Mid Cap Fund or impairing its operations.

New Fund Risk. The Fund has been newly formed and has no operating history as of the date of this Prospectus. There can be no assurance that the Fund will grow to or maintain an economically viable size

Performance

Performance information for the Defensive Small/Mid Cap Fund is not included because the Defensive Small/Mid Cap Fund did not have a full calendar year of performance prior to the date of this Prospectus. Performance information will be available in the Prospectus once the Defensive Small/Mid Cap Fund has at least one calendar year of performance. Updated performance information is available at no cost by visiting www.horizonmutualfunds.com or by calling 1-855-754-7932.

Investment Adviser

The Defensive Small/Mid Cap Fund's investment adviser is Horizon Investments, LLC.

Portfolio Managers

Scott Ladner, Chief Investment Officer of Horizon, Mike Dickson, Ph.D., Head of Research and Product Development of Horizon, and Zachary F. Hill, CFA, Head of Portfolio Management of Horizon, share responsibility for the day-to-day management of the Defensive Small/Mid Cap Fund as Co-Portfolio Managers. Mr. Ladner, Dr. Dickson, and Mr. Hill have been Co-Portfolio Managers of the Defensive Small/Mid Cap Fund since its inception in 2022.

Purchase and Sale of Fund Shares

You may purchase and redeem shares of the Defensive Small/Mid Cap Fund on any day that the New York Stock Exchange is open for trading, subject to certain restrictions described under the section titled "How to Purchase Shares" and "How to Redeem Shares" of the Defensive Small/Mid Cap Fund's Prospectus. Purchases and redemptions may be made by mailing an application or redemption request to Horizon Funds c/o U.S. Bank Global Fund Services, P.O. Box 701, Milwaukee, WI 53201-0701, or by calling 1-855-754-7932. You also may purchase and redeem shares through a financial intermediary. The minimum initial investment in the Defensive Small/Mid Cap Fund is \$2,500 and the minimum subsequent investment is \$250 for Advisor Class and Investor Class shares. The minimum initial investment in the Defensive Small/Mid Cap Fund is \$10 million for Institutional Class shares. There is no minimum subsequent investment for Institutional Class shares.

Tax Information

The Defensive Small/Mid Cap Fund's distributions are taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account. Such tax-deferred arrangements may be taxed later upon withdrawal of monies from those arrangements.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase the Defensive Small/Mid Cap Fund through a broker-dealer or other financial intermediary (such as a bank), the Defensive Small/Mid Cap Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Defensive Small/Mid Cap Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

Horizon Tactical Fixed Income Fund

Investment Objective

The investment objective of the Horizon Tactical Fixed Income Fund (the “Tactical Income Fund”) is to seek to provide total return through a combination of current income and capital appreciation.

Fees and Expenses of the Tactical Income Fund:

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Tactical Income Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below.**

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)	Advisor Class	Institutional Class	Investor Class
Management Fees	0.60%	0.60%	0.60%
Distribution and/or Service (12b-1) Fees	0.25%	None	0.10%
Other Expenses ⁽¹⁾	0.20%	0.20%	0.20%
Acquired Fund Fees and Expenses ⁽¹⁾⁽²⁾	0.28%	0.28%	0.28%
Total Annual Fund Operating Expenses	1.33%	1.08%	1.18%

(1) “Other Expenses” and “Acquired Fund Fees and Expenses” are estimated for the current fiscal year for the Institutional Class.

(2) This number represents the combined total fees and operating expenses of the underlying funds owned by the Tactical Income Fund and is not a direct expense incurred by the Tactical Income Fund or deducted from Fund assets.

Example: This Example is intended to help you compare the cost of investing in the Tactical Income Fund with the cost of investing in other mutual funds. The Example assumes that you invest \$10,000 in the Tactical Income Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Tactical Income Fund’s operating expenses remain the same (taking into account the contractual expense limitation). The fee waiver/expense reimbursement arrangement discussed in the table above is reflected only through December 31, 2023. Although your actual costs may be higher or lower, based upon these assumptions your costs would be:

	1 Year	3 Years
Advisor Class	\$135	\$421
Institutional Class	\$110	\$343
Investor Class	\$120	\$375

Portfolio Turnover

The Tactical Income Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, affect the Tactical Income Fund’s performance. No portfolio turnover rate is provided for the Tactical Income Fund because the Tactical Income Fund had not commenced operations as of the date of this Prospectus.

Principal Investment Strategies of the Tactical Income Fund

The Tactical Income Fund’s investment adviser, Horizon Investments, LLC (“Horizon”), seeks to achieve the Tactical Income Fund’s investment objective by allocating to investments across various sectors of the global securities markets. The Tactical Income Fund’s investments will be primarily comprised of fixed and floating rate bonds of U.S. and foreign corporate issuers, both those that are investment-grade and non-investment grade (i.e., high yield or “junk” bonds); debt securities issued by the U.S. government and its agencies and instrumentalities (collectively, “U.S. Government Securities”); foreign sovereign debt; preferred stocks; convertible bonds; mortgage-backed securities (“MBS”); and bank loan assignments and participations. Horizon may execute the Tactical Income Fund’s strategy by investing in exchange-traded funds (“ETFs”) that invest primarily in the foregoing or by investing directly in individual securities or baskets of securities.

Horizon selects and weights securities using a flexible approach that combines active management and quantitative models to allocate the Tactical Income Fund’s portfolio. The Tactical Income Fund’s strategy is primarily driven by a tactical, systematic approach that uses measures of past return and risk to shift the Tactical Income Fund’s holdings towards asset classes determined by Horizon to have high and stable measures of price trends. Depending on market conditions, the Tactical Fixed Income Fund may at times focus its investments in particular sectors or areas of the economy. The strategy also incorporates a tactical risk management component that monitors asset class trends on a daily basis, and, if conditions deteriorate, prompts Horizon to reduce the Tactical Income Fund’s exposure to that asset class and allocate to more defensive-oriented investments, including, without limitation, U.S. Government Securities and money market instruments. As a result of the Tactical Income Fund’s tactical risk management strategy, in certain market conditions up to 100% of the Tactical Income Fund’s portfolio may be invested in U.S. Government Securities or money market instruments.

The Tactical Income Fund invests in the securities of non-U.S. issuers, including, without limitation, securities of emerging markets issuers and, while the Tactical Income Fund will invest primarily in U.S. Dollar denominated securities, it may also invest a portion of its assets in non-U.S. Dollar denominated securities. Horizon selects portfolio investments without restriction as to the issuer country, capitalization, currency, maturity or credit quality, and investments are expected to include those rated below investment grade (commonly referred to as “high yield” or “junk” bonds). Potential investments are reviewed for trading efficiency, liquidity, risk/return profile, and fit within overall portfolio diversification needs prior to investment. Horizon generally expects to select individual securities or baskets of securities instead of ETFs when it believes such investments are more cost effective, more operationally efficient or will provide strategic exposure to a specific sector or market segment. Horizon expects to engage in frequent buying and selling of securities to achieve the Tactical Fixed Income Fund’s objective.

Under normal circumstances, the Tactical Income Fund invests not less than 80% of the value of its net assets in fixed income investments. Horizon defines fixed income investments as including: (i) any debt or debt-related securities, income producing securities, and other instruments or evidences of indebtedness, including bonds, bills, notes (including structured notes), loans, money market instruments, mortgage and asset backed securities, and preferred stocks, and derivative instruments related thereto; and (ii) ETFs and mutual funds that invest primarily in fixed income investments.

Principal Risks of the Tactical Income Fund

Many factors affect the Tactical Income Fund’s performance. The Tactical Income Fund’s share price changes daily based on changes in market conditions in response to economic, political and financial developments. The direction and extent of those price changes will be affected by the financial condition, industry and economic sector, and geographic location of the securities in which the Tactical Income Fund invests. The Tactical Income Fund is not federally insured or guaranteed by any government agency. You may lose money by investing in the Tactical Income Fund.

Management Risk. The ability of the Tactical Income Fund to meet its investment objective is directly related to the allocation of the Tactical Income Fund’s assets. Horizon may allocate the Tactical Income Fund’s investments so as to under-emphasize or over-emphasize investments at the wrong times or under the wrong market conditions, in which case the Tactical Income Fund’s value may be adversely affected. Horizon’s analysis of industries, companies, economic trends, the relative attractiveness of different securities or other matters could be wrong and may not produce desired results.

Market Risk. Investments in securities in general are subject to market risks that may cause their prices to fluctuate over time. The Tactical Income Fund’s investments may decline in value due to factors affecting securities markets generally, or particular countries, segments, economic sectors, industries or companies within those markets. The value of a security may decline due to general economic and market conditions that are not specifically related to a particular issuer. Markets may, in response to governmental actions or intervention, economic or market developments, trade disputes, the spread of infectious illness or other public health issues, geopolitical factors or other external factors, experience periods of high volatility and reduced liquidity, and, in extreme cases, may lead to restrictions and halts. During those periods, the Fund may experience high levels of shareholder redemptions, and may have to sell securities at times when the Fund would otherwise not do so, potentially at unfavorable prices. Certain securities may be difficult to value during such periods.

ETF Risk. To the extent the Tactical Income Fund invests in ETFs, you will indirectly pay fees and expenses charged by the ETFs in addition to the Tactical Income Fund’s direct fees and expenses. As a result, the cost of investing in the Tactical Income Fund will be higher than the cost of investing directly in ETF shares and may be higher than other mutual funds that invest directly in stocks and bonds. Each ETF is subject to specific risks, depending on the nature of the ETF and its underlying investments. These risks could include sector risk (increased risk from a focus on one or more sectors of the market), liquidity risk (risk that the Tactical Income Fund cannot dispose of its shares of the ETF promptly without a reduction in value) and risks associated with fixed income securities or foreign currencies.

Fluctuation of Net Asset Value (“NAV”); Unit Premiums and Discounts. The NAV of the shares of the ETFs in which the Tactical Income Fund may invest will generally fluctuate with changes in the market value of the ETF’s securities holdings and supply and demand of the ETF’s shares on the exchanges on which the ETF’s shares are traded. The market prices of an ETF’s shares may deviate significantly from the NAV of the ETF’s shares during periods of market volatility or reduced liquidity. If the Tactical Income Fund purchases an ETF’s shares at a time when the market price is at a premium to the NAV of the ETF’s shares or sells at a time when the market price is at a discount to the NAV of the ETF’s shares, then the Tactical Income Fund may sustain losses that are in addition to any losses caused by a decrease in NAV.

Fixed Income Risk. The value of investments in fixed income securities and securities in which the underlying investments are fixed income securities are expected to fluctuate with changes in interest rates. Typically, a rise in interest rates causes a decline in the value of the fixed income securities owned by the Tactical Income Fund or its underlying investments. Issuers of floating rate debt are exposed to higher interest payments in a rising rate environment. Issuers may default on interest and principal payments. Generally, securities with lower debt ratings (“junk bonds”) have greater credit risk.

Credit Risk. Issuers of fixed-income securities may default on their obligations to make interest and principal payments. Generally, securities with lower debt ratings carry a greater risk that the issuer will default on its payment obligations. Fixed-income securities rated in the fourth classification by Moody’s (Baa) and S&P (BBB) or lower (sometimes referred to as “junk bonds”) have speculative characteristics and changes in economic conditions or other circumstances are more likely to lead to a weakened capacity of those issuers to make principal or interest payments, as compared to issuers of more highly rated securities. These securities can also be thinly traded or have restrictions on resale, which can make them difficult to sell or adversely affect their market value.

Interest Rate Risk. When the Tactical Income Fund invests in bonds (either directly or through underlying investments), the value of your investment in the Tactical Income Fund will fluctuate with changes in interest rates. Typically, a rise in interest rates causes a decline in the value of bond funds owned by the Tactical Income Fund or its underlying investments. In general, the market price of debt securities with longer maturities will increase or decrease more in response to changes in interest rates than shorter-term securities.

High Yield or Junk Bond Risk. Lower-quality fixed income securities, known as “high yield” or “junk” bonds, present a significant risk for loss of principal and interest. These bonds offer the potential for higher return, but also involve greater risk than bonds of higher quality, including an increased possibility that the bond’s issuer, obligor or guarantor may not be able to make its payments of interest and principal (credit quality risk). These investments are considered to be speculative in nature.

MBS Risk. MBS are subject to credit risk because underlying loan borrowers may default. Additionally, these securities are subject to prepayment risk because the underlying loans held by the issuers may be paid off prior to maturity, reducing overall returns.

Foreign Securities Risk. Investing in securities issued by companies or governments whose location or principal business activities are outside the United States, or investing in American Depositary Receipts (“ADRs”) or ETFs focusing on such companies, may involve significant risks not present in domestic investments. There is generally less publicly available information about foreign companies and foreign government debt, and the issuers are generally not uniformly bound by consistent accounting, auditing, and financial reporting requirements and standards of practice comparable to those applicable to domestic issuers. Investments in foreign securities also involve the risk of greater price volatility and possible adverse changes in investment or exchange control regulations or currency exchange rates, expropriation or confiscatory taxation, limitation on the removal of cash or other assets from foreign markets, political or financial instability, or diplomatic and other developments, which could affect such investments.

Non-U.S. Government Debt Risk. An investment in debt obligations of non-U.S. governments and their political subdivisions (“sovereign debt”) involves special risks that are not present in corporate debt obligations, including increased volatility and possible foreign government interference. The non-U.S. issuer of the sovereign debt or the non-U.S. governmental authorities that control the repayment of the debt may be unable or unwilling to repay principal or interest when due, and a Fund may have limited recourse in the event of a default. A sovereign debtor’s willingness or ability to repay principal and pay interest in a timely manner may be affected by, among other factors, its cash flow situation, the extent of its foreign currency reserves, the availability of sufficient foreign exchange, the relative size of the debt service burden, the sovereign debtor’s policy toward its principal international lenders and local political constraints.

Emerging Markets Risk. In addition to the risks generally associated with investing in securities of foreign issuers, countries within emerging markets also may have relatively unstable governments, social and legal systems that do not protect securityholders, economies based on only a few industries, and securities markets that trade a small number of issues.

Foreign Currency Risk. Currency trading risks include market risk, credit risk and country risk. Market risk results from adverse changes in exchange rates in the currencies the Tactical Income Fund’s underlying investments are long or short. Credit risk results because a currency-trade counterparty may default. Country risk arises because a government may interfere with transactions in its currency.

Quantitative Model Risk. The Tactical Income Fund’s strategy relies heavily on quantitative models and the analysis of specific metrics to construct the Tactical Income Fund’s portfolio. The impact of these metrics on a security’s performance can be difficult to predict, and securities that previously possessed certain desirable quantitative characteristics may not continue to demonstrate those same characteristics in the future. In addition, relying on quantitative models entails the risk that the models themselves may be limited or incorrect, that the data on which the models rely may be incorrect or incomplete, and that Horizon may not be successful in selecting companies for investment or determining the weighting of particular securities in the Tactical Income Fund’s portfolio. Any of these factors could cause the Tactical Income Fund to underperform funds with similar strategies that do not select investments based on quantitative analysis.

Turnover Risk. As a result of its trading strategies, the Tactical Income Fund may sell portfolio securities without regard to the length of time they have been held and will likely have a higher portfolio turnover rate than other mutual funds. Since portfolio turnover may involve paying brokerage commissions and other transaction costs, higher turnover generally results in additional expenses, which may lower the performance of the Tactical Income Fund, and may also result in the realization of short-term capital gains. The Tactical Income Fund must generally distribute realized capital gains to shareholders, increasing the Tactical Income Fund’s taxable distributions. High rates of portfolio turnover in a given year would likely result in short-term capital gains, which are taxed to shareholders at ordinary income tax rates.

Equity Securities Risk. Preferred stocks are sensitive to interest rate changes, and are also subject to equity risk, which is the risk that stock prices will fall over short or extended periods of time. Equity securities typically have greater price volatility than fixed income securities. The market price of equity securities owned by the Tactical Income Fund may go down, sometimes rapidly or unpredictably. Equity securities may decline in value due to factors affecting equity securities markets generally, particular industries represented by those markets, or factors directly related to a specific company, such as decisions made by its management. The rights of preferred stocks on the distribution of a company’s assets in the event of a liquidation are generally subordinate to the rights associated with a company’s debt securities.

Convertible Securities Risk. The value of a convertible security is influenced by changes in interest rates (with investment value declining as interest rates increase and increasing as interest rates decline) and the credit standing of the issuer. The price of a convertible security will also normally vary in some proportion to changes in the price of the underlying common stock because of the conversion or exercise feature.

Focus Risk. To the extent that the Tactical Income Fund focuses its investments in particular industries, asset classes or sectors of the economy, any market price movements, regulatory or technological changes, or economic conditions affecting companies in those industries, asset classes or sectors may have a significant impact on the Tactical Income Fund's performance.

Bank Loans Risk. The Fund may invest in ETFs that hold bank loans. Investments in bank loans are subject to the same risks as investments in other types of debt securities, including credit risk, interest rate risk, liquidity risk and valuation risk that may be heightened because of the limited public information available regarding bank loans and because loan borrowers may be leveraged and tend to be more adversely affected by changes in market or economic conditions.

Operational and Technology Risk. Cyber-attacks, disruptions, or failures that affect the Tactical Income Fund's service providers or counterparties, issuers of securities held by the Risk Assist Fund, or other market participants may adversely affect the Tactical Income Fund and its shareholders, including by causing losses for the Tactical Income Fund or impairing its operations.

U.S. Government Securities Risk. The Fund's investment in U.S. government obligations may include securities issued or guaranteed as to principal and interest by the U.S. government, or its agencies or instrumentalities. Payment of principal and interest on U.S. government obligations may be backed by the full faith and credit of the United States or may be backed solely by the issuing or guaranteeing agency or instrumentality itself. There can be no assurance that the U.S. government would provide financial support to its agencies or instrumentalities (including government-sponsored enterprises) where it is not obligated to do so. In addition, U.S. government securities are not guaranteed against price movements due to changing interest rates.

Money Market Fund Risk. An investment in a money market fund is not a bank deposit and is not insured or guaranteed by any bank or any government agency. It is possible for the Tactical Income Fund to lose money by investing in money market funds. The value of money market instruments may be affected by changing interest rates and by changes in the credit ratings of the investments held by the money market fund.

New Fund Risk. The Fund has been newly formed and has no operating history as of the date of this Prospectus. There can be no assurance that the Fund will grow to or maintain an economically viable size

Performance

Performance information for the Tactical Income Fund is not included because the Tactical Income Fund did not have a full calendar year of performance prior to the date of this Prospectus. Performance information will be available in the Prospectus once the Tactical Income Fund has at least one calendar year of performance. Updated performance information is available at no cost by visiting www.horizonmutualfunds.com or by calling 1-855-754-7932.

Investment Adviser

The investment adviser to the Tactical Income Fund is Horizon Investments, LLC.

Portfolio Managers

Scott Ladner, Chief Investment Officer of Horizon, Mike Dickson, Ph.D., Head of Research and Product Development of Horizon, and Zachary F. Hill, CFA, Head of Portfolio Management of Horizon, share responsibility for the day-to-day management of the Tactical Income Fund as Co-Portfolio Managers. Mr. Ladner, Dr. Dickson, and Mr. Hill have been Co-Portfolio Managers of the Tactical Income Fund since its inception in 2022.

Purchase and Sale of Fund Shares

You may purchase and redeem shares of the Tactical Income Fund on any day that the New York Stock Exchange is open for trading, subject to certain restrictions described under the section titled "How to Purchase Shares" and "How to Redeem Shares" of the Tactical Income Fund's Prospectus. Purchases and redemptions may be made by mailing an application or redemption request to Horizon Funds c/o U.S. Bank Global Fund Services, P.O. Box 701, Milwaukee, WI 53201-0701, or by calling 1-855-754-7932. You also may purchase and redeem shares through a financial intermediary. The minimum initial investment in the Tactical Income Fund is \$2,500 and the minimum subsequent investment is \$250 for Advisor Class and Investor Class shares. The minimum initial investment in the Tactical Income Fund is \$10 million for Institutional Class shares. There is no minimum subsequent investment for Institutional Class shares.

Tax Information

The Tactical Income Fund's distributions are taxed as ordinary income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or an individual retirement account. Such tax-deferred arrangements may be taxed later upon withdrawal of monies from those arrangements.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase the Tactical Income Fund through a broker-dealer or other financial intermediary (such as a bank), the Tactical Income Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Tactical Income Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

ADDITIONAL INFORMATION ABOUT THE FUNDS' PRINCIPAL INVESTMENT STRATEGIES

Investment Objective: Each of the Defensive Small/Mid Cap Fund and the Tactical Income Fund (each, a "Fund") may change its investment objective without shareholder approval upon not less than 60 days' written notice to shareholders. Additionally, the 80% investment limitation for each of the Defensive Small/Mid Cap Fund and the Tactical Income Fund is non-fundamental and may be changed without shareholder approval upon 60 days' written notice to shareholders.

Additional Information Regarding the Allocation of Fund Assets Among Market Segments (Defensive Small/Mid Cap Fund and Tactical Income Fund): Horizon believes changing market conditions can provide opportunities value creation. Horizon's portfolio construction methodology is based on modern optimization and risk mitigation tools and is focused on balancing the tradeoff between expected risk and return. Risk is controlled through position, portfolio and market level metrics. Each Fund's portfolio is periodically tested through both historical as well as simulated market environments to evaluate factors relevant to that Fund, such as potential periods of volatility and downside risk.

Temporary Defensive Strategies (Defensive Small/Mid Cap Fund and Tactical Income Fund): To respond to adverse market, economic, political or other conditions, each Fund may take a defensive position and invest up to 100% of its total assets, without limitation, in high-quality short-term debt securities or money market instruments. These short-term debt securities and money market instruments may include, without limitation: shares of money market mutual funds, commercial paper, certificates of deposit, bankers' acceptances, U.S. Government securities and repurchase agreements. While a Fund is in a defensive position, the opportunity to achieve its investment objective will be limited. Furthermore, to the extent that the Fund invests in money market mutual funds for cash positions, there will be some duplication of expenses because the Fund pays its pro-rata portion of such money market funds' advisory fees and operational fees. Each Fund may also invest a substantial portion of its assets in such instruments at any time to maintain liquidity or pending selection of investments in accordance with its policies.

Fund-of-Funds (Tactical Income Fund): Horizon may execute the Tactical Income Fund's investment strategy by investing primarily in ETFs, which is commonly referred to as a "fund-of-funds" investment style. ETFs are registered investment companies that are generally index-based or actively managed. An index-based ETF typically seeks to track the performance of a particular market index. These indexes include not only broad-market indexes, but more specific indexes as well, including those relating to particular sectors, markets, regions or industries. An actively managed ETF seeks to achieve its investment objective through active management in accordance with an investment strategy, similar to other non-index-based investment companies. An ETF is traded like a stock on a securities exchange and may be purchased and sold throughout the trading day based on its market price. The trading price of an ETF fluctuates in accordance with changes in market supply and demand.

Selection of ETFs (Tactical Income Fund): Horizon selects specific ETFs for investment, in part, on their investment goals and strategies, their investment adviser and portfolio manager, and on the analysis of their past performance (absolute, relative and risk-adjusted). Horizon also considers other factors in the selection of ETFs, such as fund size, liquidity, expense ratio, reputation of sponsor, reputation and tenure of portfolio manager, general composition of its investment portfolio and current and expected portfolio holdings. Some ETFs in which a Fund may invest may not share the same investment goal or investment limitations as the Fund.

PRINCIPAL INVESTMENT RISKS

An investment in a Fund is subject to one or more of the principal risks identified in the following table and in the description of each Fund's principal risks, above. The principal risks identified below are discussed in more detail in the disclosure that immediately follows the table.

	Small/Mid Cap Defensive Fund	Tactical Income Fund
Bank Loans Risk		X

Smaller and Medium Capitalization Company Risk	X	
Turnover Risk	X	X
U.S. Government Securities Risk		X

Bank Loans Risk. Investments in bank loans are subject to the same risks as investments in other types of debt securities, including credit risk, interest rate risk, liquidity risk and valuation risk that may be heightened because of the limited public information available regarding bank loans and because loan borrowers may be leveraged and tend to be more adversely affected by changes in market or economic conditions. If a bank loan is held through another financial institution or another financial institution administers the loan, receipt of principal and interest on the loan may be subject to the credit risk of that financial institution. Any collateral securing a loan may be insufficient or unavailable in the event of default, particularly for second liens. Bank loans may not be considered “securities,” and purchasers therefore may not be entitled to rely on the anti-fraud protections of the federal securities laws.

Convertible Securities Risk. The value of a convertible security is influenced by changes in interest rates (with investment value declining as interest rates increase and increasing as interest rates decline) and the credit standing of the issuer. The price of a convertible security will also normally vary in some proportion to changes in the price of the underlying common stock because of the conversion or exercise feature. Convertible securities may be subordinate to other debt securities issued by the same issuer. Issuers of convertible securities are often not as strong financially as issuers with higher credit ratings. Convertible securities typically provide yields lower than comparable non-convertible securities. Their values may be more volatile than those of non-convertible securities, reflecting changes in the values of the securities into which they are convertible.

Credit Risk. Issuers of fixed-income securities may default on their obligations to make interest and principal payments. Generally, securities with lower debt ratings carry a greater risk that the issuer will default on its payment obligations. Fixed-income securities rated below the fourth classification by Moody’s (Baa) and S&P (BBB) (sometimes referred to as “junk bonds”) have speculative characteristics and changes in economic conditions or other circumstances are more likely to lead to a weakened capacity of those issuers to make principal or interest payments, as compared to issuers of more highly rated securities. These securities can also be thinly traded or have restrictions on resale, which can make them difficult to sell or adversely affect their market value.

Domestic Strategy Risk. Because the Defensive Small/Mid Cap Fund will invest primarily in U.S. issuers, the Fund is subject to the risk that certain changes in the U.S. economy, such as when the U.S. economy weakens or when its financial markets decline, may have an adverse effect on the securities to which the Fund has exposure, and the Fund will be restricted in its ability to allocate its investments to the securities of non-U.S. issuers.

Emerging Markets Risk. In addition to the risks generally associated with investing in securities of foreign issuers, countries with emerging markets also may have relatively unstable governments, social and legal systems that do not protect securityholders, economies based on only a few industries, and securities markets that trade a small number of issues. Emerging market countries may have relatively unstable governments, weaker economies, and less-developed legal systems which offer fewer protections to securityholders. Emerging market economies may be based on only a few industries and security issuers may be more susceptible to economic weakness and more likely to default. Emerging market securities also tend to be less liquid.

Equity Market Risk. Equity securities may experience sudden, unpredictable drops in value or long periods of decline in value. Equity securities may also lose value because of factors affecting an entire industry or sector, such as increases in production costs, or factors directly related to a specific company, such as decisions made by its management.

Common Stocks. Common stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. These investor perceptions are based on various and unpredictable factors including, competition; expectations regarding government, economic, monetary and fiscal policies; inflation and interest rates; economic expansion or contraction; and global or regional political, economic and banking crises. If an investor held common stock of an issuer, the investor would generally be exposed to greater risk than if the investor held preferred stocks and debt obligations of the issuer because holders of common stock generally have inferior rights to receive payments from issuers in comparison with the rights of the holders of other securities, bondholders and other creditors of such issuers.

Convertible Preferred Stocks. Preferred stock (see below) may also be convertible. Convertible preferred stock may be converted at a stated price within a specified period of time into a certain quantity of common stock of the same or a different issuer. Convertible preferred stock is senior to common stocks in an issuer's capital structure, but is usually subordinated to similar non-convertible securities. However, convertible preferred stock provides a fixed-income stream (generally higher in yield than the income derived from common stock but lower than that afforded by a similar non-convertible security) and gives the investor the opportunity, through the conversion feature, to participate in the capital appreciation of the issuing company depending upon a market price advance in the convertible security's underlying common stock. The market value of convertible preferred stock performs like that of a regular debt security, that is, if market interest rates rise, the value of convertible preferred stock typically falls.

Preferred Stocks. A preferred stock is a blend of the characteristics of a bond and common stock. It can offer the higher yield of a bond and has priority over common stock in equity ownership, but does not have the seniority of a bond and, unlike common stock, its participation in the issuer's growth may be limited. Preferred stock has preference over common stock in the receipt of dividends and in any residual assets after payment to creditors should the issuer be dissolved. Although the dividend on a preferred stock may be set at a fixed annual rate, in some circumstances it can be changed or omitted by the issuer. Because preferred stocks represent an equity ownership interest in an issuer, their value will usually react more strongly than bonds and other debt instruments to actual or perceived changes in an issuer's financial condition or prospects or to fluctuations in the equity markets.

Rights. Rights are usually granted to existing shareholders of a corporation to subscribe to shares of a new issue of common stock before it is issued to the public. The right entitles its holder to buy common stock at a specified price. Rights have similar features to warrants, except that the life of a right is typically much shorter, usually a few weeks. The purchase of rights involves the risk that an investor could lose the purchase value of a right if the right is not exercised prior to its expiration. Also, the purchase of rights involves the risk that the effective price paid for the right added to the subscription price of the related security may exceed the value of the subscribed security's market price such as when there is no movement in the level of the underlying security.

Warrants. A warrant gives the holder a right to purchase at any time during a specified period a predetermined number of shares of common stock at a fixed price. Unlike convertible debt securities or preferred stock, warrants do not pay a fixed coupon or dividend. Investments in warrants involve certain risks, including the possible lack of a liquid market for resale of the warrants, potential price fluctuations as a result of speculation or other factors, and failure of the price of the underlying security to reach or have reasonable prospects of reaching a level at which the warrant can be prudently exercised (in which event the warrant may expire without being exercised, resulting in a loss of a Fund's entire investment therein).

ETF Risk. When a Fund invests in ETFs, the value of your investment will fluctuate in response to the performance of those ETFs. In addition, investing through a portfolio of ETFs involves certain additional expenses and certain tax results that would not arise for direct investments in the ETFs. By investing indirectly in ETFs through a Fund, an investor will bear not only the investor's proportionate share of that Fund's expenses (including operating costs and investment advisory fees), but also, indirectly, similar expenses and charges of the ETFs. In addition, to the extent these ETFs trade their portfolios actively, they will likely incur higher brokerage commissions and increased realization of taxable gains. ETFs that use margin, leverage, short sales and other forms of financial derivatives, such as options and futures, may be more volatile than investments in other funds.

Under the Investment Company Act of 1940 (the "1940 Act"), a Fund may not acquire shares of an ETF or other investment company if, immediately after such acquisition, the Fund and its affiliated persons would hold more than 3% of the ETF's or investment company's total outstanding shares unless (i) the ETF or the Fund has received an order for exemptive relief from the 3% limitation from the Securities and Exchange Commission (the "SEC") that is applicable to the Fund or complies with Rule 12d1-4 under the 1940 Act; and (ii) the ETF and the Fund take appropriate steps to comply with any conditions in such order or Rule 12d1-4, as applicable. Accordingly, the 3% limitation may prevent the Fund from allocating its investments in the manner the Funds adviser considers optimal or cause the adviser to select an investment other than that which it considers optimal.

Index-based ETFs may not be able to replicate exactly the performance of the indices they track because the total return generated by the securities will be reduced by transaction costs incurred in adjusting the actual balance of the securities. Index-based ETFs that utilize a representative sampling approach to track their respective underlying indices are subject to an increased risk of tracking error because the securities selected for the ETF in the aggregate may vary from the investment profile of the underlying index. Additionally, if using a representative sampling approach, an ETFs will typically hold a smaller number of securities than the underlying index, and as a result, an adverse development to an ETF could result in a greater decline in NAV than would be the case if the ETF held all of the securities in the underlying index.

Fixed Income Risk. The value of investments in fixed income securities, options on fixed income securities or in securities in which the underlying investments are fixed income securities are expected to fluctuate with changes in interest rates. Typically, a rise in interest rates causes a decline in the value of the fixed income securities. In general, the market price of fixed income securities with longer maturities will increase or decrease more in response to changes in interest rates than shorter-term securities. Issuers of floating rate debt are exposed to higher interest payments in a rising rate environment, which increases the change of default. Other risk factors impacting fixed income securities include credit risk, maturity risk, market risk, extension or prepayment risk, illiquid security risks, investment-grade and high yield securities risk. Issuers may default on interest and principal payments. Generally, securities with lower debt ratings (“junk bonds”) have greater credit risk.

Fluctuation of NAV; Unit Premiums and Discounts. The NAV of the shares of the ETFs in which a Fund may invest will generally fluctuate with changes in the market value of the ETF’s securities holdings. The market prices of an ETF’s shares will generally fluctuate in accordance with changes in the ETF’s NAV and supply and demand of the ETF’s shares on the exchanges on which the ETF’s shares are traded. It cannot be predicted whether an ETF’s shares will trade below, at or above their NAV. Price differences may be due, in large part, to the fact that supply and demand forces at work in the secondary trading market for the ETF’s shares will be closely related to, but not identical to, the same forces influencing the prices of the securities of the ETF trading individually or in the aggregate at any point in time. The market prices of an ETF’s shares may deviate significantly from the NAV of the ETF’s shares during periods of market volatility or illiquidity. While an ETF’s creation/redemption feature is designed to make it likely that the ETF’s shares normally will trade close to its NAV, disruptions to creations and redemptions and/or market volatility may result in trading prices that differ significantly from the ETF’s NAV. If a Fund purchases an ETF’s shares at a time when the market price is at a premium to the NAV of the ETF’s shares or sells at a time when the market price is at a discount to the NAV of the ETF’s shares, then the Fund may sustain losses that are in addition to any losses caused by a decrease in NAV.

Market makers (other than lead market makers) have no obligation to make markets in an ETF’s shares and may discontinue doing so at any time without notice. To the extent that no market makers are willing to process creation and/or redemption orders for an ETF, shares of the ETF may trade like closed-end fund shares at a discount to NAV and the ETF may possibly face delisting. Trading in an ETF’s shares may be halted because of market conditions or for reasons that, in the view of the exchange on which the ETF lists its shares, make trading in the ETF’s shares inadvisable. In addition, trading in an ETF’s shares is subject to trading halts caused by extraordinary market volatility pursuant to “circuit breaker” rules. During stressed market conditions, the liquidity of an ETF’s shares may be less than the liquidity of the securities in the ETF’s portfolio. Any of the foregoing would have an adverse effect on the value of the Fund’s investment in the ETF’s shares.

Focus Risk. To the extent that a Fund focuses its investments in particular industries, asset classes or sectors of the economy, any market price movements, regulatory or technological changes, or economic conditions affecting companies in those industries, asset classes or sectors may have a significant impact on the Fund’s performance.

Foreign Currency Risk. Currency trading involves significant risks, including market risk, interest rate risk, country risk, counterparty credit risk and short sale risk. Market risk results from the price movement of foreign currency values in response to shifting market supply and demand. Since exchange rate changes can readily move in one direction, a currency position carried overnight or over a number of days may involve greater risk than one carried a few minutes or hours. Interest rate risk arises whenever a country changes its stated interest rate target associated with its currency. Country risk arises because virtually every country has interfered with international transactions in its currency. Interference has taken the form of regulation of the local exchange market, restrictions on foreign investment by residents or limits on inflows of investment funds from abroad. Restrictions on the exchange market or on international transactions are intended to affect the level or movement of the exchange rate. This risk could include the country issuing a new currency, effectively making the “old” currency worthless. ETFs that hold short positions in foreign currencies, or buy or write options on currency-focused ETFs, in an attempt to hedge against, or generate returns from, potential depreciation in the value of a currency are subject to the risks of rising currency values.

Foreign Securities Risk. Investing in securities issued by companies or governments whose location or principal business activities are outside the United States, or investing in ADRs or ETFs focusing on such companies, may involve significant risks not present in domestic investments. There is generally less publicly available information about foreign issuers, particularly those not subject to the disclosure and reporting requirements of U.S. securities laws. Foreign issuers are generally not uniformly bound by consistent accounting, auditing, and financial reporting requirements and standards of practice comparable to those applicable to domestic issuers. Investments in foreign securities also involve the risk of possible adverse changes in investment or exchange control regulations or currency exchange rates, expropriation or confiscatory taxation, limitation on the removal of cash or other assets of the Fund from foreign markets, political or financial instability, or diplomatic and other developments which could affect such investments. Further, economies of particular countries or areas of the world may differ favorably or unfavorably from the economy of the United States. Foreign securities often trade with less frequency and volume than domestic securities and therefore may exhibit greater price volatility. ADRs provide a method whereby the Fund may invest in securities issued by companies whose principal business activities are outside the United States. ADRs are receipts typically issued by a U.S. bank or trust company evidencing ownership of the underlying securities, and may be issued as sponsored or unsponsored programs. In sponsored programs, an issuer has made arrangements to have its securities trade in the form of ADRs. In unsponsored programs, the issuer may not be directly involved in the creation of the program. Although regulatory requirements with respect to sponsored and unsponsored programs are generally similar, in some cases it may be easier to obtain financial information from an issuer that participates in a sponsored program.

High Yield or Junk Bond Risk. Lower-quality fixed-income securities, known as “high yield” or “junk” bonds, present a significant risk for loss of principal and interest. These bonds offer the potential for higher return, but also involve greater risk than bonds of higher quality, including an increased possibility that the bond’s issuer, obligor or guarantor may not be able to make its payments of interest and principal (credit quality risk). These investments are considered to be speculative in nature.

Interest Rate Risk. The value of investments in bonds (made either directly or through underlying investments) will fluctuate with changes in interest rates. Typically, a rise in interest rates causes a decline in the value of bonds. In general, the market price of debt securities with longer maturities will increase or decrease more in response to changes in interest rates than shorter-term securities. In recent years the U.S. has experienced historically low interest rates, increasing the exposure of fixed income investors to the risks associated with rising interest rates. It is likely there will be less governmental action in the near future to maintain low interest rates. The negative impact on fixed income securities from the resulting rate increases for that and other reasons could be swift and significant. Rising interest rates tend to extend the duration of securities, making them more sensitive to changes in interest rates. The value of longer-term securities generally changes more in response to changes in interest rates than shorter-term securities. As a result, in a period of rising interest rates, some fixed income securities may experience increased volatility and may lose value, which could adversely impact a Fund’s net asset value. Rising interest rates could also impair the ability of borrowers to service interest payment obligations and make principal loan repayments, which could adversely impact a Fund’s net investment income and its distributions to shareholders. Additionally, decreases in the value of fixed income securities could lead to increased shareholder redemptions, which could impair a Fund’s ability to achieve its investment objective.

Management Risk. The ability of a Fund to meet its investment objective is directly related to the allocation of that Fund’s assets. Horizon may allocate a Fund’s investments so as to under-emphasize or over-emphasize investments under the wrong market conditions, in which case a Fund’s value may be adversely affected. Horizon’s judgments about the attractiveness, value and potential appreciation of particular security or other investment in which a Fund invests or sells short may prove to be incorrect and may not produce the desired results.

Market Risk. Investments in securities and other investments in general are subject to market risks that may cause their prices to fluctuate over time. Investments may decline in value due to factors affecting securities markets generally, or particular countries, segments, economic sectors, industries or companies within those markets. The value of a security may decline due to general economic, political and market conditions that are not specifically related to a particular issuer, such as real or perceived adverse economic conditions or changes in interest or currency rates. Also, certain market events could increase volatility and exacerbate market risk, such as changes in governments’ economic policies, political turmoil, environmental events, trade disputes, and epidemics, pandemics or other public health issues. For example, the novel coronavirus disease (COVID-19) that emerged in 2020 resulted in closing borders, closings of non-essential businesses, quarantines, cancellations, disruptions to supply chains and customer activity, trading halts, government economic stimulus measures, rapid increases in unemployment, as well as general concern and uncertainty, thus causing significant disruptions to global business activity and financial markets. During those periods, a Fund may experience high levels of shareholder redemptions, and may have to sell securities at times when the Fund would otherwise not do so, potentially at unfavorable prices. Certain securities may be difficult to value during such periods. The value of securities convertible into equity securities, such as warrants or convertible debt, is also affected by prevailing interest rates, the credit quality of the issuer and any call provision. Fluctuations in the value of a Fund’s securities (which may be material on a daily, weekly, monthly or other basis) will cause the NAV of that Fund to fluctuate. In addition, market events and disruptions such as long-term pandemics may result in the Funds and their service providers experiencing operational difficulties in managing overloads to information technology and communications, coordinating a remote workforce and implementing business continuity plans, among others.

Money Market Fund Risk. An investment in a money market fund is not a bank deposit and is not insured or guaranteed by any bank or any government agency. It is possible for the Tactical Income Fund to lose money by investing in money market funds. The value of money market instruments may be affected by changing interest rates and by changes in the credit ratings of the investments held by the money market fund. If the liquidity of a money market fund’s portfolio deteriorates below certain levels, the money market fund may suspend redemptions and thereby prevent the Tactical Income Fund from selling its investment in the money market fund or impose a fee of up to 2% on amounts the Fund redeems from the money market fund. These measures may result in an investment loss or prohibit the Tactical Income Fund from redeeming shares when the Adviser would otherwise redeem shares.

Mortgage Backed Securities Risk. MBS are subject to credit risk because underlying loan borrowers may default. Additionally, these securities are subject to prepayment risk because the underlying loans held by the issuers may be paid off prior to maturity, reducing overall returns. The value of these securities may go down as a result of changes in prepayment and/or default rates on the underlying mortgage loans. During periods of declining interest rates, prepayment rates usually increase and a Fund may have to reinvest prepayment proceeds at lower interest rates. During periods of rising interest rates, prepayment rates usually decrease and a Fund may have less opportunity to reinvest prepayment proceeds at higher interest rates.

New Fund Risk. The Small/Mid Cap Defensive Fund and the Tactical Income Fund are recently formed and have limited operating histories. There can be no assurance that either Fund will grow to or maintain an economically viable size.

Non-U.S. Government Debt Risk. An investment in debt obligations of non-U.S. governments and their political subdivisions (“sovereign debt”) involves special risks that are not present in corporate debt obligations. The non-U.S. issuer of the sovereign debt or the non-U.S. governmental authorities that control the repayment of the debt may be unable or unwilling to repay principal or interest when due, and a Fund may have limited recourse in the event of a default. During periods of economic uncertainty, the market prices of sovereign debt may be more volatile than prices of debt obligations of U.S. issuers. In the past, certain non-U.S. countries have encountered difficulties in servicing their debt obligations, withheld payments of principal and interest and declared moratoria on the payment of principal and interest on their sovereign debt.

A sovereign debtor’s willingness or ability to repay principal and pay interest in a timely manner may be affected by, among other factors, its cash flow situation, the extent of its foreign currency reserves, the availability of sufficient foreign exchange, the relative size of the debt service burden, the sovereign debtor’s policy toward its principal international lenders and local political constraints. Sovereign debtors may also be dependent on expected disbursements from non-U.S. governments, multinational agencies and other entities to reduce principal and interest arrearages on their debt. The failure of a sovereign debtor to implement economic reforms, achieve specified levels of economic performance or repay principal or interest when due may result in the cancellation of third-party commitments to lend funds to the sovereign debtor, which may further impair such debtor’s ability or willingness to service its debts.

Operational and Technology Risk. Cyber-attacks, disruptions, or failures that affect the Funds’ service providers or counterparties, issuers of securities held by the Funds, or other market participants may adversely affect the Funds and their shareholders, including by causing losses for the Funds or impairing fund operations.

Cyber-attacks may include unauthorized attempts by third parties to improperly access, modify, disrupt the operations of, or prevent access to the systems of the Funds’ service providers or counterparties, issuers of securities held by the Funds or other market participants or data within them. In addition, power or communications outages, information technology equipment malfunctions, operational errors, and inaccuracies within software or data processing systems, whether the result of acts of god, terrorist acts, war, cyber-attack, pandemic or otherwise, may also disrupt business operations or impact critical data. Market events also may trigger a volume of transactions that overloads current information technology and communication systems and processes, impacting the ability to conduct the Funds’ operations.

Cyber-attacks, disruptions, or failures may adversely affect the Funds and their shareholders or cause reputational damage and subject the Funds to regulatory fines, litigation costs, penalties or financial losses, reimbursement or other compensation costs, and/or additional compliance costs. For example, the Funds’ or its service providers’ assets or sensitive or confidential information may be misappropriated, data may be corrupted, and operations may be disrupted (e.g., cyber-attacks or operational failures may cause the release of private shareholder information or confidential fund information, interfere with the processing of shareholder transactions, impact the ability to calculate the Funds’ net asset value, and impede trading). In addition, cyber-attacks, disruptions, or failures involving a Fund counterparty could affect such counterparty’s ability to meet its obligations to the Fund, which may result in losses to the Fund and its shareholders. Similar types of operational and technology risks are also present for issuers of securities held by the Funds, which could have material adverse consequences for such issuers, and may cause the Funds’ investments to lose value. Furthermore, as a result of cyber-attacks, disruptions, or failures, an exchange or market may close or issue trading halts on specific securities or the entire market, which may result in the Funds being, among other things, unable to buy or sell certain securities or financial instruments or unable to accurately price its investments.

While the Funds and their service providers may establish business continuity and other plans and processes that seek to address the possibility of and fallout from cyberattacks, disruptions or failures, there are inherent limitations in such plans and systems, including that they do not apply to third parties, such as Fund counterparties, issuers of securities held by the Funds, or other market participants, as well as the possibility that certain risks have not been identified or that unknown threats may emerge in the future and there is no assurance that such plans and processes will address the possibility of and fallout from cyber-attacks, disruptions, or failures. In addition, the Funds cannot directly control any cybersecurity plans and systems put in place by their service providers, Fund counterparties, issuers of securities held by the Funds, or other market participants.

For example, the Funds rely on various sources to calculate their NAV. Therefore, the Funds are subject to certain operational risks associated with reliance on third party service providers and data sources. NAV calculation may be impacted by operational risks arising from factors such as failures in systems and technology. Such failures may result in delays in the calculation of the Funds’ NAV and/or the inability to calculate NAV over extended time periods. The Funds may be unable to recover any losses associated with such failures.

Options Risk. Investments in options involve risks different from, or possibly greater than, the risks associated with investing directly in securities, including leverage risk, tracking risk and, in the case of over the counter options, counterparty default risk. Option positions may expire worthless exposing the Fund to potentially significant losses. If a Fund writes options, it may receive a premium that is small relative to the loss realized in the event of adverse changes in the value of the underlying instruments. When the Fund utilizes options spreads, collars or other combinations, the premium received for writing the call option offsets, in part, the premium paid to purchase the corresponding put option; however, the Fund’s participation in gains above the price of the call option are forfeited in return for receiving the call option premium. To the extent a Fund writes options on individual securities that it does not hold in its portfolio (i.e., “naked” options), it is subject to the risk that a liquid market for the underlying security may not exist at the time an option is exercised or when the Fund otherwise seeks to close out an option position. Naked call options, in particular, have speculative characteristics and the potential for unlimited loss. Option prices are highly volatile and may fluctuate substantially during a short period of time. Such prices are influenced by numerous factors that affect the markets, including, but not limited to: changing supply and demand relationships; government programs and policies; national and international political and economic events, changes in interest rates, inflation and deflation and changes in supply and demand relationships.

Trading options involves risks different from, or possibly greater than, the risks associated with investing directly in securities including:

Liquidity Risk. It is possible that particular investments might be difficult to purchase or sell, possibly preventing a Fund from executing positions at an advantageous time or price, or possibly requiring them to dispose of other investments at unfavorable times or prices in order to satisfy the Fund's obligations.

Options Collars. A "collar" position combines a put option purchased by an investor (the right of the investor to sell a specific security within a specified period) with a call option that is written by the investor (the right of the counterparty to buy the same security) in a single instrument. An investor's right to sell the security is typically set at a price that is below the counterparty's right to buy the security. Thus, the combined position "collars" the performance of the underlying security, providing protection from depreciation below the price specified in the put option, and allowing for limited participation in appreciation (up to the price specified by the call option). The premium received for writing an option offsets, in part, the premium paid to purchase the corresponding option, however, participation in gains above the price of the call option are forfeited in return for receiving the call option premium.

When an investor writes a call or put option on an underlying securities it does not own (is not short), the option is sometimes referred to as a "naked option". When writing "naked" call options, an investor must deposit and maintain sufficient margin with the broker-dealer through which it wrote the "naked" call option as collateral to ensure that it meets its obligations as the writer of the option. Registered funds are further subject to segregation requirements (described in the SAI) when the fund writes "naked" call options. Such segregation will ensure that a fund has assets available to satisfy its obligations with respect to the transaction, but will not limit the fund's exposure to loss. During periods of declining securities prices or when prices are stable, writing "naked" call options can be a profitable strategy to increase income with minimal capital risk. However, when the price of the security underlying a written option increases, the investor is exposed to an increased risk of loss, because if the price of the security underlying the option exceeds the option's exercise price, the investor will lose the difference. "Naked" written call options are riskier than covered call options because there is no underlying security held by the investor that can act as a partial hedge. "Naked" written call options have speculative characteristics, and the potential for loss is theoretically unlimited. When a "naked" written call option is exercised, the investor must purchase the underlying security to meet its delivery obligation or make a payment equal to the value of its obligation in order to close out the option. There is also a risk, especially with less liquid preferred and debt securities or small capitalization securities, that the securities may not be available for purchase.

Speculation Risk. Because option premiums paid or received by an investor are small in relation to the market value of the investments underlying the options, buying and selling put and call options can be more speculative than investing directly in securities.

Quantitative Model Risk. Each Fund's strategy relies heavily on quantitative models and the analysis of specific metrics to construct the fund's portfolio. The impact of these metrics on a security's performance can be difficult to predict, and securities that previously possessed certain desirable quantitative characteristics may not continue to demonstrate those same characteristics in the future. In addition, relying on quantitative models entails the risk that the models themselves may be limited or incorrect, that the data on which the models rely may be incorrect or incomplete, and that the investment adviser(s) may not be successful in selecting companies for investment or determining the weighting of particular securities in a Fund's portfolio. Any of these factors could cause a Fund to underperform funds with similar strategies that do not select investments based on quantitative analysis.

Real Estate Risk. Real estate values rise and fall in response to a variety of factors, including local, regional and national economic conditions, interest rates and tax considerations. When economic growth is slow, demand for property decreases and prices tend to decline. Property values tend to decrease because of overbuilding, increases in property taxes and operating expenses, changes in zoning laws, environmental regulations or hazards, uninsured casualty or condemnation losses, or a general decline in neighborhood values. A REIT's performance depends on the types and locations of the properties the REIT owns, how well the REIT manages those properties, competition faced by the REIT's properties, market conditions and other factors. A decline in rental income may result from extended vacancies, increased competition from other properties, tenants' failure to pay rent or poor management. A REIT's performance also depends on the company's ability to finance property purchases and renovations and manage its cash flows. Because REITs typically are invested in a limited number of projects or in a particular market segment, they are more susceptible to adverse developments affecting a single project or market segment than more broadly diversified investments. Changes in regulations may have adverse effects on the value or performance of REITs or their properties.

Smaller and Medium Capitalization Company Risk. Investments in small and medium capitalization companies may be more vulnerable than larger, more established organizations to adverse business or economic developments. In particular, small and medium- capitalization companies may have more price volatility, greater spreads between their bid and ask prices, significantly lower trading volumes, and cyclical or static growth prospects. Small-capitalization and medium-capitalization companies often have limited product lines, markets, and financial resources and may be dependent upon a relatively small management group. These securities may trade over- the-counter or on an exchange and may or may not pay dividends. In addition, small and medium capitalization companies may be particularly affected by interest rate increases, as they may find it more difficult to borrow money to continue or expand operations, or may have difficulty in repaying any loans.

Turnover Risk. A higher portfolio turnover may result in higher transactional and brokerage costs associated with the turnover which will reduce a Fund's return, unless the securities traded can be bought and sold without corresponding commission costs. Active trading of securities may also increase a Fund's realized capital gains or losses, which may affect the taxes you pay as a Fund shareholder.

U.S. Government Securities Risk. A Fund's investment in U.S. government obligations may include securities issued or guaranteed as to principal and interest by the U.S. government, or its agencies or instrumentalities. Payment of principal and interest on U.S. government obligations may be backed by the full faith and credit of the United States or may be backed solely by the issuing or guaranteeing agency or instrumentality itself. There can be no assurance that the U.S. government would provide financial support to its agencies or instrumentalities (including government-sponsored enterprises) where it is not obligated to do so. In addition, U.S. government securities are not guaranteed against price movements due to changing interest rates.

Non-Principal Risks

In addition to the principal risks outlined above, an investment in a Fund is also subject to the following additional risk:

Commodity Risk. Exposure to commodities through underlying investments that invest in commodities may subject an investor to greater volatility than investments in traditional securities. The value of such investments may be affected by changes in overall market movements, commodity index volatility, changes in interest rates, or sectors affecting a particular industry or commodity, such as drought, floods, weather, livestock disease, embargoes, tariffs, and international economic, political and regulatory developments.

Loans of Portfolio Securities. Each Fund may lend its portfolio securities to brokers, dealers, banks and other institutional investors. By lending its portfolio securities, the Fund attempts to increase its net investment income through the receipt of interest on the cash collateral with respect to the loan or fees received from the borrower in connection with the loan. Any gain or loss in the market price of the securities loaned that might occur during the term of the loan would be for the account of the Fund. Each Fund employs an agent to implement the securities lending program and the agent receives a fee from the Fund for its services. A Fund will not lend more than 33⅓% of the value of its total assets.

A Fund may lend its portfolio securities so long as the terms, structure and the aggregate amount of such loans are not inconsistent with the 1940 Act or the rules and regulations or interpretations of the SEC thereunder. While voting rights pass with the loaned securities, each Fund will retain the right to call any security in anticipation of a vote that Horizon deems material to the security on loan.

Loans of securities involve a risk that the borrower may fail to return the securities or may fail to maintain the proper amount of collateral, which may result in a loss of money by the Fund. There may be risks of delay and costs involved in recovery of securities or even loss of rights in the collateral should the borrower of the securities fail financially. These delays and costs could be greater for foreign securities. However, loans will be made only to borrowers deemed by the Fund's adviser to be creditworthy and when, in the judgment of the adviser, the income that can be earned from such securities loans justifies the attendant risk. Each Fund bears the risk that the reinvestment of collateral will result in a principal loss. Finally, there is the risk that the price of the securities will increase while they are on loan and the collateral will not be adequate to cover their value.

Temporary Defensive Strategies

To respond to adverse market, economic, political or other conditions, each Fund may take a defensive position and invest up to 100% of its total assets, without limitation, in high-quality short-term debt securities or money market instruments. These short-term debt securities and money market instruments may include, without limitation: shares of money market mutual funds, commercial paper, certificates of deposit, bankers' acceptances, U.S. Government securities and repurchase agreements. While a Fund is in a defensive position, the opportunity to achieve its investment objective will be limited. Furthermore, to the extent that the Fund invests in money market mutual funds for cash positions, there will be some duplication of expenses because the Fund pays its pro-rata portion of such money market funds' advisory fees and operational fees. Each Fund may also invest a substantial portion of its assets in such instruments at any time to maintain liquidity or pending selection of investments in accordance with its policies.

Portfolio Holdings Disclosure

A description of the Funds' policies regarding the release of portfolio holdings information is available in the Funds' Statement of Additional Information. The Funds may, from time to time, make available quarter-end (and in some instances month-end) portfolio holdings information on their website at www.horizonmutualfunds.com. The portfolio holdings are generally posted to the website within 30 days following the end of each quarter (or month as applicable) and remain available until more recent portfolio holdings are posted. Shareholders may request portfolio holdings schedules at no charge by calling 1-855-754-7932.

MANAGEMENT OF THE FUNDS

Investment Adviser

Horizon Investments, LLC, a South Carolina limited liability company, serves as investment adviser to each of the Funds. Horizon has been an investment adviser since 1995, and serves individuals, mutual funds, employee benefit plans, trusts and corporations. Horizon maintains its principal offices at 6210 Ardrey Kell Road, Suite 300, Charlotte, North Carolina 28277. Under the terms of its Investment Advisory Agreement with each Fund, Horizon is responsible for formulating each Fund's investment program, making day-to-day investment decisions and engaging in portfolio transactions. Horizon provides office space, services and equipment and assistance in supervising matters relating to the Funds' operations. As of June 30, 2022, Horizon managed approximately \$7.4 billion in client assets.

Under the terms of the Investment Advisory Agreements, Horizon receives monthly fees from each Fund calculated in accordance with the following:

Small/Mid Cap Defensive Fund	At an annual rate of 0.80% of the Fund's average daily net assets.
Tactical Income Fund	At an annual rate of 0.60% of the Fund's average daily net assets.

A discussion regarding the basis for the Board of Trustees' approval of the Investment Advisory Agreements for the Small/Mid Cap Defensive Fund and the Tactical Income Fund will be included in the Funds' [annual report](#) to shareholders dated November 30, 2022.

Multi-Manager Structure. Horizon, subject to the approval of the Board of Trustees, has ultimate responsibility to recommend the hiring, termination and replacement of sub-advisers, if any, on behalf of each Fund (each, a "Sub-Advised Fund"), and to supervise, monitor and evaluate the performance of each sub-adviser thereof. The Trust, on behalf of each Sub-Advised Fund, and Horizon have obtained an order from the SEC (the "Order") that permits Horizon to appoint or replace certain sub-advisers to manage all or a portion of each Sub-Advised Fund's assets and enter into, amend or terminate a sub-advisory agreement with certain sub-advisers, in each case subject to the approval of the Board, but without obtaining shareholder approval ("multi-manager structure"). None of the Funds is currently operating in a multi-manager structure, although the shareholders of each Fund have approved its operation in a multi-manager structure and such Funds may determine to operate in this way in the future. Board approval of any change of a Sub-Advised Fund's sub-adviser will include a determination by the Board that the change is in the best interests of the Sub-Advised Fund and its shareholders and, based on the information provided to the Board, does not involve a conflict of interest from which Horizon, a sub-adviser, any officer or trustee of the Sub-Advised Fund, or any officer or board member of Horizon derives an inappropriate advantage. Pursuant to the Order, Horizon, with the approval of the Board, has the discretion to terminate any sub-adviser and allocate and reallocate the Sub-Advised Fund's assets among any other sub-advisers. Because Horizon compensates each sub-adviser out of its management fee, Horizon is able to reduce a Sub-Advised Fund's sub-advisory fees and retain a larger portion of the management fee, or increase the Sub-Advised Fund's sub-advisory fees and retain a smaller portion of the management fee. Pursuant to the Order, Horizon is not required to publicly disclose its contractual fee arrangements with any sub-adviser. Each Sub-Advised Fund and Horizon is subject to the conditions imposed by the Order, including the condition that within 90 days of hiring a new sub-adviser pursuant to the multi-manager structure, the Sub-Advised Fund will provide shareholders with an information statement containing information about the new sub-adviser. The shareholders of each Sub-Advised Fund have approved the multi-manager structure described herein.

Expense Limitation Agreements

Horizon has agreed to waive its advisory fee and reimburse expenses to limit total operating expenses of each Fund, at least until December 31, 2023, so that direct expenses (exclusive of front-end or contingent deferred loads; brokerage fees and commissions; acquired fund fees and expenses; borrowing costs (such as interest and dividend expense on securities sold short); payments, if any, under a Rule 12b-1 Distribution Plan or Shareholder Servicing Plan; expenses paid with securities lending expense offset credits; taxes; and extraordinary expenses (such as litigation)) of each Fund do not exceed the amounts listed below:

	Advisor Class	Institutional Class	Investor Class
Small/Mid Cap Defensive Fund	0.99%	0.99%	0.99%
Tactical Income Fund	0.80%	0.80%	0.80%

Any fees waived or expenses reimbursed are subject to possible recoupment by Horizon within 36 months after such fees have been waived or expenses reimbursed, if such recoupment can be achieved without exceeding the lower of the expense limit in place at the time of the waiver or reimbursement and the expense limit in place at the time of recoupment.

Portfolio Managers

Scott Ladner – Chief Investment Officer (Small/Mid Cap Defensive Fund, Tactical Income Fund)

Mr. Ladner serves as Chief Investment Officer and is the Chair of the Investment Committee for Horizon. In these capacities, he oversees all aspects of the Investment Management division for the firm. He also provides the Investment Management division with Macro analysis and interpretation of global derivatives, credit, foreign exchange, equity, and funding markets. His previous roles at Horizon included Head of Risk and Director of Quantitative & Alternative Strategies. Prior to joining Horizon, Mr. Ladner was a founder of Charlotte Global Advisors and Principal Guard, LLC. Mr. Ladner helped to launch an equity index volatility and dispersion trading unit at PEAK6 Investments in Chicago, a proprietary listed option and volatility trading firm. Previously at First Union/Wachovia, Mr. Ladner founded and ran the equity swap and forwards portfolio while also managing equity option and volatility portfolios. He also co-founded and managed the Risk Arbitrage and Special Situations portfolio. Mr. Ladner then managed the swaption and cap/floor portion of the bank's interest rate derivatives portfolio. Mr. Ladner received his BA in Economics and Russian Language & Literature from the University of North Carolina at Chapel Hill.

Mike Dickson, Ph.D. – Head of Research and Product Development (Small/Mid Cap Defensive Fund, Tactical Income Fund)

Dr. Dickson serves as the Head of Research and Product Development. He leads Horizon's systematic strategy and process design for all investment strategies managed by the firm. He also oversees the team's research efforts focused on quantitative methods to support Horizon's investment process, risk management, and new product development. Additionally, Dr. Dickson serves as a Portfolio Manager for the firm's mutual fund trust, sub-advisory relationships and model portfolios. He joined Horizon in 2015 and previous roles include Head of Portfolio Management and Director of Structured Financial Solutions. Dr. Dickson specializes in the areas of systematic index design, portfolio construction, and risk mitigation. Both during and after his Ph.D. studies, he taught undergraduate and graduate school coursework in finance and portfolio management at University of North Carolina at Charlotte. Prior to earning his Ph.D., he worked in financial analysis support roles at Premier, Inc. and Global Compliance. Dr. Dickson received his BS in Chemistry from Winthrop University and an MS in Economics and Ph.D. in Finance from UNC Charlotte.

Zachary F. Hill, CFA – Head of Portfolio Management (Small/Mid Cap Defensive Fund, Tactical Income Fund)

Mr. Hill serves as the Head of Portfolio Management at Horizon Investments. He oversees the implementation and communication for all investment strategies managed by Horizon across the firm's mutual funds and model portfolios. Prior to this role, Mr. Hill served as the Global Macro Strategist where he focused on providing investment insights on asset allocation decisions from a global macro and derivatives perspective. Prior to joining Horizon, Mr. Hill held senior roles with Cold Spring Asset Management in New York and in the Foreign Exchange division of Wachovia/Wells Fargo. Mr. Hill received a BA in Economics and a BA in Physics from the University of Virginia. He is also a CFA® Charterholder.

The SAI provides additional information about the Portfolio Managers' compensation, other accounts managed by the Portfolio Managers, and the Portfolio Managers' ownership of securities in the Funds.

HOW SHARES ARE PRICED

The price of each Fund's shares is based on the Fund's NAV. Each Fund's NAV is calculated on each day that the New York Stock Exchange ("NYSE") is open. The NYSE is closed on weekends and most national holidays. The calculated and reported NAV of a Fund is the value of a single share of the Fund. The NAV is calculated for each Fund at the close of business of the NYSE, normally 4:00 p.m. Eastern time ("Valuation Time"), and the price at which a purchase or redemption of a Fund share is effected is based on the next calculation of net asset value after the order is placed. Each Fund's NAV is determined by subtracting the total of a Fund's liabilities from its total assets and dividing the remainder by the number of shares outstanding. Due to the fact that different expenses are charged to the Advisor Class, Institutional Class and Investor Class shares of a Fund, the NAV of the three classes of a Fund may vary. The value of a Fund's total assets is generally based on the market value of the securities that a Fund holds. Fund portfolio securities, which are traded on a national securities exchange, are valued at the last quoted sale price. NASDAQ traded securities are valued using the NASDAQ official closing price (NOCP). Certain short-term securities are valued on the basis of amortized cost. Foreign securities may be traded in their primary markets on weekends or other days when a Fund does not price its shares. Similarly, when the Funds hold securities traded in foreign markets that close prior to U.S. markets then significant events, including company-specific developments or broad market moves, may affect the value of foreign securities held by the Funds. Therefore, the NAV of a Fund holding foreign securities may change on days when shareholders will not be able to buy or redeem their Fund shares. The Funds normally use third party pricing services to obtain market quotations.

If a security does not have a readily available market quotation, Horizon values the security based on fair value, as determined in good faith in accordance with the guidelines established by the Funds' Board of Trustees (the "Board"). The types of securities for which fair value pricing is required include, but are not limited to:

- Securities for which market quotations are insufficient or not readily available at the Valuation Time on a particular Business Day (including securities for which there is a short and temporary lapse in the provision of a price by the regular pricing source);
- Securities for which, in the judgment of Horizon, the prices or values available do not represent the fair value of the instrument. Factors which may cause Horizon to make such a judgment include, but are not limited to, the following: only a bid price or an asked price is available; the spread between bid and asked prices is substantial; the frequency of sales; the thinness of the market; the size of reported trades; and actions of the securities markets, such as the suspension or limitation of trading;
- Securities determined to be illiquid; and

- Securities with respect to which an event that will affect the value thereof has occurred since the closing prices were established on the principal exchange on which they are traded, but prior to a Fund's calculation of its NAV.

Fair value pricing should result in a more accurate determination of a Fund's NAV, which should eliminate the potential for arbitrage in the Fund. However, valuing securities at fair value involves greater reliance on judgment than securities that have readily available market quotations. There can be no assurance that the Funds could purchase or sell a portfolio security at the price used to calculate the Funds' NAVs. In the case of fair valued portfolio securities, lack of information and uncertainty as to the significance of information may lead to a conclusion that a prior valuation is the best indication of a portfolio security's present value. Fair valuations may remain unchanged until new information becomes available. Consequently, changes in the fair valuation of portfolio securities may be less frequent and of greater magnitude than changes in the price of portfolio securities valued by an independent pricing service, or based on market quotations.

Fair valuation of a Fund's portfolio securities can serve to reduce arbitrage opportunities available to short term traders, but there is no assurance that fair value pricing policies will prevent dilution of a Fund's NAV by short-term traders. There is no assurance that a Fund will obtain the fair value assigned to a security if it were to sell such security while it is fair valued.

With respect to any portion of the Funds' assets that are invested in one or more open-end management investment companies that are registered under the Investment Company Act of 1940 (the "1940 Act"), each Fund's NAV is calculated based upon the NAV of the registered open-end management investment companies in which a Fund invests, and the prospectuses for these companies explain the circumstances under which those companies will use fair value pricing and the effects of using fair value pricing.

HOW TO PURCHASE SHARES

Choosing a Class

Each Fund has authorized three classes of shares, Advisor Class, Institutional Class and Investor Class. Each class of shares is designed for specific investors. Not all classes are currently being offered for sale.

If you are making your initial investment in a Fund, you must select a class of shares. Each class represents an interest in the same portfolio of securities and each has the same rights with one exception. Pursuant to the 1940 Act, you will have exclusive voting rights with respect to the Distribution Plan pursuant to Rule 12b-1, if any, for the class you choose.

Different share classes allow you to choose the class that will be most beneficial to you. Your decision should depend upon a number of factors including the amount you purchase and the length of time you plan to hold the shares. All share classes are not available to all investors. Your financial consultant can assist you in determining which class is best for you. Because all future investments in your account will be made in the share class you designate when opening the account, you should make your decision carefully.

12b-1 Plans. The Board of Trustees of the Funds has adopted, on behalf of the Advisor Class shares and Investor Class shares of each Fund, a Distribution Plan pursuant to Rule 12b-1 under the 1940 Act (the "12b-1 Plan"). The 12b-1 Plan allows a Fund to use part of its assets for the sale and distribution of these Shares, including advertising, marketing and other promotional activities, as well as shareholder servicing. For these services, under the 12b-1 Plan, each Fund is authorized to pay the Distributor a distribution fee at the rate of up to 0.25% of average net assets attributable to Advisor Class shares, and 0.10% of average net assets attributable to Investor Class shares of that Fund on an annualized basis. The Distributor may use monies authorized by the 12b-1 Plan to compensate other parties that have entered into selling and/or shareholder servicing agreements with Distributor with respect to the distribution of Fund shares. Because these distribution and shareholder service fees are paid out of a Fund's assets on an ongoing basis, the fees under the 12b-1 Plan may, over time, increase the cost of investing in that Fund and cost investors more than other types of sales loads.

Advisor Class

Advisor Class shares are offered without any sales charges, and are not subject to shareholder servicing fees but are subject to a 0.25% 12b-1 fee.

Investor Class

Investor Class shares are offered only through financial intermediaries that have been approved by the Funds and are offered without any sales charges, but are subject to a 0.10% 12b-1 fee.

Please refer to your financial representative for detailed information on purchasing Investor Class shares of any Fund.

Institutional Class

Institutional Class shares are offered without any sales charges, and are not subject to any 12b-1 or shareholder servicing fees.

Additional Information Regarding the Purchase of Shares

All checks must be in U.S. Dollars drawn on a domestic bank. The Funds will not accept payment in cash or money orders. The Funds do not accept post-dated checks or any conditional order or payment. To prevent check fraud, the Funds will not accept third party checks, Treasury checks, credit card checks, traveler's checks or starter checks for the purchase of shares.

The Transfer Agent will charge a \$25 fee against a shareholder's account, in addition to any loss sustained by a Fund, for any payment that is returned. It is the policy of the Funds not to accept applications under certain circumstances or in amounts considered disadvantageous to shareholders. The Funds reserve the right to reject any application.

To buy shares of the Funds, complete an account application and send it together with your check for the amount you wish to invest in the Funds to the address below. To make additional investments once you have opened your account, write your account number on the check and send it together with the Invest by Mail form from your most recent confirmation statement received from the transfer agent. If you do not have the Invest by Mail form, include the Fund name, address, and account number on a separate piece of paper along with your check. If you are purchasing Shares, you may send your purchase request to:

By Regular Mail

Horizon Funds
c/o U.S. Bank Global Fund Services
P.O. Box 701
Milwaukee, WI 53201-0701

By Overnight Delivery

Horizon Funds
c/o U.S. Bank Global Fund Services
615 East Michigan Street, 3rd Floor
Milwaukee, WI 53202

The Funds do not consider the U.S. Postal Service or other independent delivery services to be their agents. Therefore, deposit in the mail or with such services, or receipt at the Transfer Agent's post office box, of purchase orders or redemption request does not constitute receipt by the Transfer Agent or the Funds. Receipt of purchase orders or redemption requests is based on when the order is received at the Transfer Agent's offices.

For initial purchases by wire

If you are making your first investment in the Funds, before you wire funds, the Transfer Agent must have a completed account application. You may mail or overnight deliver your account application to the Transfer Agent. Upon receipt of your completed account application, the Transfer Agent will establish an account for you. The account number assigned will be required as part of the instruction that should be provided to your bank to send the wire. Your bank must include both the name of the Fund you are purchasing, the account number, and your name so that monies can be correctly applied. Your bank should transmit funds by wire to:

U.S. Bank, N.A.
777 East Wisconsin Avenue
Milwaukee, WI 53202
ABA #075000022
Credit:
U.S. Bancorp Fund Services, LLC
Account #112-952-137
Further Credit:
(name of Fund to be purchased)
(shareholder registration)
(shareholder account number)

For subsequent investment by wire

Before sending your wire, please contact the Transfer Agent to advise them of your intent to wire funds. This will ensure prompt and accurate credit upon receipt of your wire.

Wired funds must be received prior to 4:00 p.m. Eastern time to be eligible for same day pricing. The Funds and U.S. Bank, N.A. are not responsible for the consequences of delays resulting from the banking or Federal Reserve wire system, or from incomplete wiring instructions.

Telephone Purchases

Investors may purchase additional shares of the Funds by calling 1-855-754-7932. If you elected this option on your account application, and your account has been open for at least 7 business days, telephone orders will be accepted via electronic funds transfer from your bank account through the Automated Clearing House (ACH) network. You must have banking information established on your account prior to making a purchase. If your order is received prior to 4 p.m. Eastern time, your shares will be purchased at the net asset value calculated on the day your order is placed.

Telephone trades must be received by or prior to market close. During periods of high market activity, shareholders may encounter higher than usual call waits. Please allow sufficient time to place your telephone transaction.

Automatic Investment Plan (AIP)

Once your account has been opened with the initial minimum investment you may make additional purchases at regular intervals through the Automatic Investment Plan. This Plan provides a convenient method to have monies deducted from your bank account, for investment into the Fund, on a monthly basis. In order to participate in the Plan, each purchase must be in the amount of \$100 or more, and your financial institution must be a member of the Automated Clearing House (ACH) network. If your bank rejects your payment, the Fund's transfer agent will charge a \$25 fee to your account. To begin participating in the Plan, please complete the Automatic Investment Plan section on the account application or call the Fund's transfer agent at 1-855-754-7932 for instructions. Any request to change or terminate your Automatic Investment Plan should be submitted to the transfer agent 5 days prior to the effective date.

HOW TO REDEEM SHARES

You have the right to sell ("redeem") all or any part of your shares subject to certain restrictions. Selling your shares in a Fund is referred to as a "redemption" because the Funds buy back their shares. We will redeem your shares at a price per share equal to the NAV next computed following receipt of your redemption request in good order. See the section entitled "Redemption Procedures Request in Good Order".

The Funds typically expect to meet redemption requests by paying out proceeds from cash or cash equivalent portfolio holdings, or by selling portfolio holdings. In stressed market conditions, redemption methods may include redeeming in kind. We will mail your redemption proceeds to your address of record, or, if previously established on your account, you may have proceeds sent by wire or electronic funds transfer through the ACH network directly to your bank account. Wires are subject to a \$15 fee paid by the investor and your bank may charge a fee to receive wired funds. You do not incur any charge when proceeds are sent via the ACH network; however, credit may not be available in your bank account for two to three days.

The Funds typically send the redemption proceeds on the next business day (a day when the NYSE is open for normal business) after the redemption request is received in good order and prior to market close, regardless of whether the redemption proceeds are sent via check, wire, or ACH transfer. Under unusual circumstances, the Funds may suspend redemptions, or postpone payment for up to seven days, as permitted by federal securities law. If you purchase shares by check or electronic funds transfer through the ACH network and, soon after, request a redemption, your redemption request will not be processed until the purchase amount has cleared (usually within 10 calendar days). This delay will not apply if you purchased your shares via wire payment.

The Funds cannot accept requests that specify a certain date for redemption or which specify any other special conditions. Redemption proceeds must be payable to the registered shareholder(s) of the account or to a financial intermediary for the benefit of the registered shareholder(s) of the account. Please call 1-855-754-7932 for further information. We will not process your redemption request if it is not in good order. We will notify you if your redemption request is not in good order.

If, as a result of your redemption, your account value drops below \$2,500, we may redeem the remaining shares in your account. We will notify you in writing of our intent to redeem your shares. We will allow at least sixty days thereafter for you to make an additional investment to bring your account value up to at least the minimum amount before we will process the redemption.

Systematic Withdrawal Plan

For Investor Class shares, please refer to your financial representative for detailed information on whether your financial representative's firm is participating in the Funds' systematic withdrawal plan. Generally, a Fund will mail your redemption proceeds to your address of record or transmit them electronically to your designated bank account. Except under certain extraordinary conditions, we will send your redemption to you within seven days after we receive your redemption request. If you purchase shares by check and, soon after, request a redemption, your redemption request will not be processed until the check used for your purchase has cleared (usually within 10 calendar days). Generally, if your current account value is at least \$10,000, you may adopt a Systematic Withdrawal Plan to provide for monthly, quarterly or other periodic checks for any designated amount of \$100 or more.

For Advisor Class, Investor Class and Institutional Class shares, if your current account value is at least \$10,000, you may adopt a Systematic Withdrawal Plan to provide for monthly, quarterly or other periodic checks for any designated amount of \$100 or more. If you wish to open a Systematic Withdrawal Plan, please indicate on your application or contact the Funds at 1-855-754-7932 for instructions. You may also elect to modify or terminate your participation in this Plan at any time by contacting the transfer agent at least 5 days prior to the next scheduled withdrawal.

Signature Guarantees

Under certain circumstances, your redemption request must be accompanied by a signature guarantee. Signature guarantees will generally be accepted from domestic banks, brokers, dealers, credit unions, national securities exchanges, registered securities associations, clearing agencies and savings associations, as well as from participants in the New York Stock Exchange Medallion Signature Program and the Securities Transfer Agents Medallion Program ("STAMP"). A notary public is not an acceptable signature guarantor.

A signature guarantee, from either a Medallion program member or a non-Medallion program member, is required in the following situations:

- If ownership is being changed on your account;
- When redemption proceeds are payable or sent to any person, address or bank account not on record;
- When a redemption request is received by the Transfer Agent and the account address has changed within the last 30 calendar days;
- For all redemptions in excess of \$50,000 from any shareholder account.

A Fund may waive any of the above requirements in certain instances. In addition to the situations described above, the Fund(s) and/or the Transfer Agent reserve the right to require a signature guarantee in other instances based on the circumstances relative to the particular situation.

Non-financial transactions, including establishing or modifying certain services on an account, may require a signature guarantee, signature verification from a Signature Validation Program member, or other acceptable form of authentication from a financial institution source.

Third Party Transactions

The Funds have authorized certain financial intermediaries to accept on their behalf purchase and redemption orders. The Funds will be deemed to have received the order when an approved financial intermediary or an authorized designee accepts your order. Your order will be priced per share at that Fund's NAV next computed after it is received by an approved financial intermediary or its authorized designee.

If you buy and redeem shares of the Funds through a member of the Financial Industry Regulatory Authority, Inc. that member may charge you a fee for that service. The Funds have authorized one or more brokers to accept on their behalf purchase and redemption orders. Such brokers are authorized to designate intermediaries to accept orders on the Funds' behalf. The Funds will be deemed to have received the order when an authorized broker or a broker authorized designee accepts your order. Your order will be priced per share at that Fund's NAV next computed after it is received by the authorized broker or broker authorized designee.

Horizon may pay certain financial institutions (which may include banks, brokers, securities dealers and other industry professionals) a fee for providing distribution related services and/or for performing certain administrative and servicing functions for Fund shareholders and/or making the Funds available for purchase on their platforms. However, distribution-related fees are made from Horizon and are not charged to the Funds, unless part of an approved 12b-1 Plan.

Redemptions in Kind

The Funds reserve the right to honor requests for redemption or repurchase orders by making payment in whole or in part in readily marketable securities ("redemption in kind") if the amount of such a request is large enough to affect operations (for example, if the request is greater than \$250,000 or 1% of a Fund's assets). The securities will be chosen by each Fund and be valued at an amount equal to the net asset value of the shares being redeemed. A shareholder may incur transaction expenses in subsequently converting these securities to cash.

Method of Redemption	Redemption Procedures
By Telephone	<p>You may authorize redemption of some or all shares in your account with each Fund by telephoning the Funds at 1-855-754-7932, between 8:30 a.m. and 4:00 p.m. Eastern time on any day the Funds are open.</p> <p>You will NOT be eligible to use the telephone redemption service if you:</p> <ul style="list-style-type: none"> • have declined or canceled your telephone investment privilege; • wish to redeem shares valued in excess of \$50,000 or if you ask us to send the redemption proceeds using an address, bank instructions, or payee other than what is currently on file; • must provide supporting legal documents such as a signature guarantee for redemption; or • wish to redeem from certain type of retirement accounts.
By Mail	<p>If you are redeeming Shares, you may send your redemption request to:</p> <p style="text-align: center;">By Regular Mail Horizon Funds c/o U.S. Bank Global Fund Services P.O. Box 701 Milwaukee, WI 53201-0701</p> <p style="text-align: center;">By Overnight Delivery Horizon Funds c/o U.S. Bank Global Fund Services 615 East Michigan Street, 3rd Floor Milwaukee, WI 53202</p> <p>You must include the following information in your written request:</p> <ul style="list-style-type: none"> • a letter of instruction stating the name of the Fund, the number of shares or dollar amount you are redeeming, the names in which the account is registered and your account number; • other supporting legal documents, if necessary, for redemption requests by corporations, trusts and partnerships; • a signature guarantee, if necessary.
By Wire	<p>You may request your redemption proceeds be wired directly to the bank account designated on your application. The Funds' Transfer Agent will charge you a \$15.00 fee for each wire redemption. The Transfer Agent will deduct the fee from your redemption proceeds for complete and share certain redemptions and directly from your account in the case of a partial redemption. Your bank may also impose a fee for the</p>
Request in "Good Order"	<p>For our mutual protection, all redemption requests must include:</p> <ul style="list-style-type: none"> • your account number; • the amount of the transaction; • for mail request, signatures of all owners EXACTLY as registered on the account and signature guarantees, if required (signature guarantees can be obtained at most banks, credit unions, and licensed brokers); and • any supporting legal documentation that may be required. <p>Your redemption request will be processed at the next determined share price after we have received all required information.</p>
IMPORTANT NOTE	<p>Once we have processed your redemption request, and a confirmation number has been given, the transaction cannot be revoked.</p>

Other Redemption Considerations

Shareholders who have an IRA or other retirement plan must indicate on their written redemption request whether or not to withhold federal income tax. Redemption requests failing to indicate an election not to have tax withheld will generally be subject to 10% withholding. Shares held in IRA or other retirement plan accounts may be redeemed by telephone at 1-855-754-7932. Investors will be asked whether or not to withhold taxes from any distribution.

The Funds do not consider the U.S. Postal Service or other independent delivery services to be their agents. Therefore, deposit in the mail or with such services, or receipt at the Transfer Agent's post office box, of purchase orders or redemption requests does not constitute receipt by the Transfer Agent or the Funds. Receipt of purchase orders or redemption requests is based on when the order is received at the Transfer Agent's offices.

Options For Redemption Proceeds

You may receive your redemption proceeds by check, ACH transfer, or wire.

Check Redemptions. Normally we will mail your check within two business days of a redemption.

ACH Redemptions. Before you can receive redemption proceeds by ACH, you must establish this option by completing a special form or the appropriate section of your account application.

Wire Redemptions. Before you can receive redemption proceeds by wire, you must establish this option by completing a special form or the appropriate section of your account application.

You may request that your redemption proceeds be wired directly to your bank account. The Funds' Transfer Agent imposes a \$15.00 fee for each wire redemption and deducts the fee directly from your account. Your bank may also impose a fee for the incoming wire. The redemption proceeds must be paid to the same bank and account as designated on the application or in written instructions in proper form subsequently received by the Fund.

Telephone Redemptions

We will automatically establish the telephone redemption option for your account, unless you instruct us otherwise in writing. Telephone redemptions are easy and convenient, but this account option involves a risk of loss from unauthorized or fraudulent transactions. We will take reasonable precautions to protect your account from fraud. You should do the same by keeping your account information private and by reviewing immediately any account statements and confirmations that you receive. Please contact us immediately about any transaction you believe to be unauthorized.

The Funds reserve the right to refuse a telephone redemption if the caller cannot provide:

- the account number
- the name and address exactly as registered on the account
- the primary social security or employer identification number as registered on the account

The Funds will not be responsible for any account losses due to telephone fraud, so long as we have taken reasonable steps to verify the caller's identity. If an account has more than one owner or authorized person, the Funds will accept telephone instructions from any one owner or authorized person. Once a telephone transaction has been placed, it cannot be canceled or modified after the close of regular trading on the NYSE (generally, 4:00 p.m., Eastern time). If you wish to cancel the telephone redemption feature for your account, please notify us in writing.

Limitation On Purchases and Redemptions

Purchases or sales of shares of the Funds should not be used to try to take advantage of short-term swings in the market. Frequent purchase and sale transactions create higher expenses for the Fund. Accordingly, the Funds reserve the right to limit or terminate the ability to purchase shares of the Funds for any shareholder making frequent purchases or sales.

Transferring Registration

You can transfer the registration of your shares in the Funds to another owner by completing a transfer form and sending it to the Horizon Funds, c/o U.S. Bank Global Fund Services, P.O. Box 701, Milwaukee, WI 53201-0701. Generally, a signature guarantee is required for all transfers.

Other Purchase Information

Each Fund reserves the right, in its sole discretion, to suspend the offering of its shares or any class thereof, to reject any purchase order or to waive any minimum investment requirements.

Purchases of each Fund's shares will be made in full and fractional shares of the Fund calculated to three decimal places. In the interest of economy and convenience, certificates for shares will not be issued.

Policy on prohibition of Foreign Shareholders

Shares of the Funds have not been registered for sale outside of the United States. Accordingly, the Funds generally require that all shareholders must be U.S. persons with a valid U.S. taxpayer identification number to open an account with the Funds. The Funds generally do not sell shares to investors residing outside the United States, even if they are United States citizens or lawful permanent residents, except to investors with United States military APO or FPO addresses. In the rare event that the Transfer Agent is unable to verify your identity, the Fund reserves the right to redeem your account at the current day's net asset value.

Lost Shareholders, Inactive Accounts and Unclaimed Property

It is important that the Funds maintain a correct address for each shareholder. An incorrect address may cause a shareholder's account statements and other mailings to be returned to the Funds. Based upon statutory requirements for returned mail, a Fund will attempt to locate the shareholder or rightful owner of the account. If the Fund is unable to locate the shareholder, then it will determine whether the shareholder's account can legally be considered abandoned. Your mutual fund account may be transferred to the state government of your state of residence if no activity occurs within your account during the "inactivity period" specified in your state's abandoned property laws. The Funds are legally obligated to escheat (or transfer) abandoned property to the appropriate state's unclaimed property administrator in accordance with statutory requirements. The shareholder's last known address of record determines which state has jurisdiction. Please proactively contact the Transfer Agent at 1-855-754-7932 (toll free) at least annually to ensure your account remains in active status.

If you are a resident of the state of Texas, you may designate a representative to receive notifications that, due to inactivity, your mutual fund account assets may be delivered to the Texas Comptroller. Please contact the Transfer Agent if you wish to complete a Texas Designation of Representative form.

HOW TO EXCHANGE SHARES

Exchanges of all or a portion of your investment from a Fund for shares in an identically registered account of another Horizon Fund may be made as long as the exchange is for the same class of shares of the other Horizon Fund. Any new account established through an exchange will be subject to the minimum investment requirements described above. Exchanges will be executed on the basis of the relative NAV of the shares exchanged after your request for an exchange is received. An exchange is considered to be a sale of shares for federal income tax purposes on which you may realize a taxable gain or loss. Call the Funds to learn more about exchanges. If you purchased shares of a Fund through your financial intermediary, please contact your financial intermediary to determine if you may take advantage of the exchange policies described in this section and for your financial intermediary's policies to effect an exchange.

The Funds are intended as a long-term investment vehicle and not to provide a means of speculating on short-term market movements. In addition, excessive trading can hurt the Funds' performance and shareholders. Therefore, each Fund may terminate, without notice, the exchange privilege of any investor who uses the exchange privilege excessively. The Funds may change or temporarily suspend the exchange privilege during unusual market conditions.

TAX STATUS, DIVIDENDS AND DISTRIBUTIONS

As a shareholder of a Fund, you are entitled to your share of that Fund's net income and capital gains on its investments. Each Fund passes substantially all of its earnings along to its investors as distributions. When a Fund earns dividends from stocks and interest from bonds and other debt securities and distributes these earnings to shareholders, it is called a dividend. Each Fund realizes capital gains when it sells securities for a higher price than it paid. When net long-term capital gains are distributed to shareholders, it is called a capital gain distribution. Net short-term capital gains are considered ordinary income and are included in dividends.

Long-Term vs. Short-Term Capital Gains

- Long-term capital gains are realized on securities held for more than one year and are part of your capital gain distribution.
- Short-term capital gains are realized on securities held less than one year and are part of your dividends.

The Defensive Small/Mid Cap Fund distributes any dividends annually. The Tactical Income Fund distributes any dividends quarterly. Each Fund distributes any capital gains annually. These distributions are typically declared and paid in December, and are taxable as if paid on December 31st of the year declared. A Fund may make an additional distribution if necessary to avoid federal income or excise taxes or as otherwise approved by the Board of Trustees. The IRS requires you to report these amounts on your income tax return for the year declared.

You will receive distributions from the Funds in additional shares of the Funds unless you choose to receive your distributions in cash. If you wish to change the way in which you receive distributions, please contact your financial representative for instructions.

If an investor elects to receive distributions in cash and the U.S. Postal Service cannot deliver your check, or if a check remains uncashed for six months, the Funds reserve the right to reinvest the amount of the distribution check in the shareholder's account at the distributing Fund's then current NAV per share and to reinvest all subsequent distributions. You may change your distribution option in writing or by telephone. Any request for change should be submitted at least 5 days prior to the record date of the next distribution.

Federal Tax Considerations

The following information is meant as a general summary for U.S. taxpayers (other than U.S. investors who hold their shares in an IRA or other tax-qualified plan). Additional tax information appears in the SAI. Shareholders should rely on their own tax advisors for advice about the particular federal, state, and local tax consequences of investing in the Fund.

Taxes on Distributions. You may be subject to federal income tax and possibly state taxes on all Fund distributions. Your distributions will be taxed in the same manner whether you receive the distributions in cash or additional shares of the Funds making the distribution. Distributions that are derived from net long-term capital gains will generally be taxed as long-term capital gains. The rate of tax will depend on how long the Funds held the securities on which it realized the gains. In general, for individual shareholders, the maximum long-term capital gain rate is 20 percent. All other distributions, including short-term capital gains, will be taxed as ordinary income. Each Fund sends detailed tax information to its shareholders about the amount and type of its distributions by January 31st for the prior calendar year.

Dividends and other distributions each Fund declares, as well as redemption proceeds, may also be subject to state and local taxes.

Taxes on Sales. If you redeem your shares of a Fund, you may be subject to tax on any taxable gain. Your taxable gain or loss is computed by subtracting your tax basis in the shares from the redemption proceeds. Because your tax basis depends on the original purchase price and on the price at which any dividends may have been reinvested, you should keep your account statements so that you or your tax preparer will be able to determine whether a sale or exchange will result in a taxable gain or loss. All or a portion of any loss realized upon a taxable disposition of Fund shares will be disallowed if you purchase other substantially identical shares within 30 days before or 30 days after the disposition. In such a case, the basis of the newly purchased shares will be adjusted to reflect the disallowed loss.

“Buying a Dividend”. Unless your investment is in a tax-deferred account, you may want to avoid investing in the Funds close to the date of a distribution because you pay the full pre-distribution price for your shares and then receive part of your investment back as a taxable distribution.

Tax Withholding. The Funds may be required to withhold U.S. federal income tax at the rate of 24% from all taxable distributions and from proceeds from certain sales and exchanges payable to shareholders who fail to provide the Funds with their correct taxpayer identification number or to make required certifications, or who have been notified by the IRS that they are subject to backup withholding. Any such withheld amounts may be credited against the shareholder’s U.S. federal income tax liability.

Medicare Tax. Certain U.S. shareholders, including individuals and estates and trusts, will be subject to an additional 3.8% Medicare tax on all or a portion of their “net investment income,” which should include dividends from the Funds and net gains from the disposition of shares of the Fund. U.S. shareholders are urged to consult their own tax advisors regarding the implications of the additional Medicare tax resulting from an investment in the Fund.

Cost Basis. A shareholder’s basis in shares of a Fund that he or she acquires (“Covered Shares”) will be determined in accordance with the Funds’ default method, which is average basis, unless the shareholder affirmatively elects in writing, which may be electronic, to use a different acceptable basis determination method, such as a specific identification method. Each Fund, or its administrative agent, must report to the Internal Revenue Service (“IRS”) and furnish to its shareholders the basis information for Covered Shares. Fund shareholders should consult with their tax advisors to determine the best IRS-accepted basis determination method for their tax situation and to obtain more information about how the basis reporting law applies to them.

FREQUENT PURCHASES AND REDEMPTIONS OF SHARES

The Board has adopted policies and procedures with respect to frequent purchases and redemptions of Fund shares by Fund shareholders and discourages market timing. Market timing is an investment strategy using frequent purchases, redemptions and/or exchanges in an attempt to profit from short-term market movements. Market timing may disrupt portfolio management strategies and hurt Fund performance. Such practices may dilute the value of Fund shares, interfere with the efficient management of the Funds’ investments, and increase brokerage and administrative costs. The Funds may reject purchase orders or temporarily or permanently revoke privileges if there is reason to believe that a shareholder is engaging in market timing activities. Brokers maintaining omnibus accounts with the Funds have agreed to provide shareholder transaction information, to the extent known to the broker, to the Funds upon request. The Funds do not accommodate frequent purchases and redemptions of Fund shares by Fund shareholders.

To prevent disruption in the management of the Fund, excessive trading or exchange activity is limited. An investor’s right to purchase additional shares may be revoked if the redemption or exchange activity is considered excessive. Generally, trading or exchange activity is considered excessive if an exchange or redemption in excess of a predetermined dollar amount occurs within 7 calendar days of purchase.

The Funds may accept redemptions and exchanges in excess of the above guidelines if they believe that granting such exceptions is in the best interest of the Funds and the redemption is not part of a market timing strategy.

It is a violation of policy for an officer or Trustee of the Funds to knowingly facilitate a purchase or redemption where the shareholder executing the transaction is engaged in any activity which violates the terms of the Funds’ Prospectus or Statement of Additional Information, and/or is considered not to be in the best interests of the Funds or their other shareholders.

Each Fund will apply its policies and procedures uniformly to all Fund shareholders. Although the Funds intend to deter market timing, there is no assurance that they will be able to identify and eliminate all market timers. For example, certain accounts called “omnibus accounts” include multiple shareholders. Omnibus accounts typically provide the Funds with a net purchase or redemption request on any given day where purchasers of the Funds’ shares and redeemers of the Funds’ shares are netted against one another and the identities of individual purchasers and redeemers whose orders are aggregated are not known by the Fund. The netting effect often makes it more difficult for the Funds to detect market timing, and there can be no assurance that the Funds will be able to do so. Therefore, with respect to Omnibus accounts, the Funds rely on selling group members to enforce the Funds’ market timing policies and procedures. Omnibus account arrangements are common forms of holding shares of the Funds. While the Funds will encourage financial intermediaries to apply the Funds’ Market Timing Trading Policy to their customers who invest indirectly in the Funds, the Funds are limited in its ability to monitor the trading activity or enforce the Funds’ Market Timing Trading Policy with respect to customers of financial intermediaries. For example, should it occur, the Funds may not be able to detect market timing that may be facilitated by financial intermediaries or made difficult to identify in the omnibus accounts used by those intermediaries for aggregated purchases, exchanges, and redemptions on behalf of all their customers. More specifically, unless the financial intermediaries have the ability to apply the Funds’ Market Timing Trading Policy to their customers through such methods as implementing short-term trading limitations or restrictions and monitoring trading activity for what might be market timing, the Funds may not be able to determine whether trading by customers of financial intermediaries is contrary to the Funds’ Market Timing Trading Policy. However, the Funds will ensure that financial intermediaries maintaining omnibus accounts on behalf of the Funds enter into an agreement with the Funds to provide shareholder transaction information, to the extent known to the financial intermediary, to the Funds upon request.

Each Fund reserves the right to modify its policies and procedures at any time without prior notice as it deems in its sole discretion to be in the best interests of its shareholders, or to comply with state or Federal legal requirements.

Anti-Money Laundering Program

In compliance with the USA Patriot Act of 2001, please note that the Transfer Agent will verify certain information on your Account Application as part of the Fund's Anti-Money Laundering Program. As requested on the Application, you must supply your full name, date of birth, social security number and permanent street address. If you are opening the account in the name of a legal entity (e.g., partnership, limited liability company, business trust, corporation, etc.), you must also supply the identity of the beneficial owners. Mailing addresses containing only a P.O. Box will not be accepted. Please contact the Transfer Agent at 1-855-754-7932 if you need additional assistance when completing your Application.

If we do not have a reasonable belief of the identity of a customer, the account will be rejected or the customer will not be allowed to perform a transaction on the account until such information is received. In the rare event that the Transfer Agent is unable to verify your identity, the Fund reserves the right to redeem your account at the current day's net asset value.

HOUSEHOLDING

To reduce expenses, the Trust mails only one copy of the prospectus and other similar documents to those addresses shared by two or more accounts. If you wish to receive individual copies of these documents, please call the Funds at 1-855-754-7932 between the hours of 8:30 a.m. and 6:00 p.m. Eastern time on days the Funds are open for business or contact your financial institution. The Trust will begin sending you individual copies thirty days after receiving your request.

ADDITIONAL INFORMATION

The Trust enters into contractual arrangements with various parties, including among others, the Funds' investment adviser, principal underwriter, custodian and transfer agent, who provide services to the Funds. Shareholders are not parties to any such contractual arrangements or intended beneficiaries of those contractual arrangements, and those contractual arrangements are not intended to create in any shareholder any right to enforce them against the service providers or to seek any remedy under them against the service providers, either directly or on behalf of the Trust.

This prospectus provides information concerning the Funds that you should consider in determining whether to purchase Fund shares. Neither this prospectus nor the Statement of Additional Information is intended, or should be read, to be or give rise to an agreement or contract between the Trust, the Trustees or any Fund and any investor, or to give rise to any rights in any shareholder or other person other than any rights under federal or state law that may not be waived.

FINANCIAL HIGHLIGHTS

No financial highlights are presented for the Funds because the Funds had not commenced operations prior to the date of this Prospectus.

PRIVACY NOTICE

FACTS	WHAT DOES HORIZON FUNDS DO WITH YOUR PERSONAL INFORMATION?		
Why?	Financial companies choose how they share your personal information. Federal law gives consumers the right to limit some but not all sharing. Federal law also requires us to tell you how we collect, share and protect your personal information. Please read this notice carefully to understand what we do.		
What?	The types of personal information we collect and share depend on the product or service you have with us. This information can include: <ul style="list-style-type: none"> ▪ Social Security number and account information ▪ Account balance and transaction history ▪ Wire Transfer Instructions 		
How?	All financial companies need to share your personal information to run their everyday business. In the section below, we list the reasons financial companies can share their customers' personal information the reasons Horizon Funds chooses to share and whether you can limit this sharing.		
Reasons we can share your personal information			
	Does Horizon Funds share?	Can you limit this sharing?	
For our everyday business purposes – Such as to process your transactions, maintain your account(s), respond to court orders and legal investigations or report to credit bureaus	Yes	No	
For our marketing purposes – to offer our products and services to you	No	We don't share	
For joint marketing with other financial companies	No	We don't share	
For our affiliates' everyday business purposes – information about your transactions and experiences or creditworthiness	No	We don't share	
For non-affiliates to market to you	No	We don't share

WHERE TO GO FOR MORE INFORMATION

You will find more information about the Funds in the following documents:

Annual and Semi-annual Reports. The Funds' annual and semi-annual reports, when available, will list the holdings in the Funds, describe the Funds' performance, and include financial statements for the Funds, and the Funds' annual report will discuss the market conditions and strategies that significantly affected the Funds' performance during the prior fiscal year.

Statement of Additional Information ("SAI"). The Statement of Additional Information contains additional and more detailed information about the Funds.

The SAI is incorporated by reference into (and is thus a part of) this Prospectus.

The SAI and the Funds' annual and semi-annual reports are available, without charge, upon request. In addition to requesting these documents from your financial representative, there are three additional ways to get a copy of these documents:

1. Request a copy by calling the Fund at 1-855-754-7932 or submitting a written request to the address listed below and a copy will be sent to you without charge.

Horizon Funds
c/o U.S. Bank Global Fund Services
P.O. Box 701
Milwaukee, WI 53201-0701

The Prospectus, Annual Report, Semi-Annual Report and holdings information are available at www.horizonmutualfunds.com.

2. Go to the EDGAR Database on the SEC's website (www.sec.gov) and download a free text-only version. Copies of the SAI, Annual Report, Annual Report, and Semi-annual may be obtained after paying a duplicating fee, by electronic request to publicinfo@sec.gov.

If you are a current Fund shareholder and would like information about your account, account transactions, or account statements, please call us at 1-855-754-7932.

If you purchased your shares through a financial institution, you may contact that institution for more information.
