WHAT WERE THE FUND'S COST FOR THE LAST YEAR?

(based on a hypothetical \$10,000 investment)

Class Name	Cost of a \$10,000 Investment	Cost Paid as a percentage of a \$10,000 Investment
Centre American Select Equity Fund - Investor	\$134	1.34%

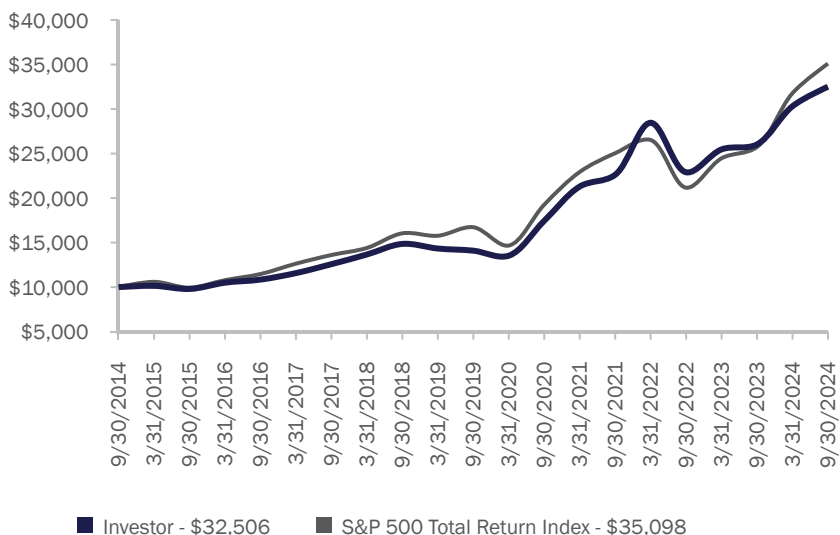

HOW DID THE FUND PERFORM LAST YEAR?

The Fund returned 24.88% for the 12 months ended September 30, 2024. This is in contrast to the S&P 500 Total Return Index, which had a 36.35% return for the same time period.

The strongest contributors to performance within the American Select Equity Fund over the one-year period ended September 30, 2024, included investments within the Consumer Discretionary sector: Hasbro, MercadoLibre, and Amazon; and the Information Technology sector: Nvidia. Stock investments that contributed negatively to the Fund's relative performance over the period were in the Consumer Staples sector and included Kraft Heinz, PepsiCo, Tyson Foods, Estee Lauder, Molson Coors, and Boston Beer. Sectoral Biases, particularly our overweight posture in Consumer Staples and Health Care, contributed negatively as well as the impact from hedging instruments, namely put options on the S&P 500 Index, as the put option positions were affected negatively from the rise in the S&P 500 Index and corresponding sharp fall in implied volatility.

In the Fund, we continue to emphasize more idiosyncratic risk-oriented companies that are less influenced by a pervasive market effect and have historically demonstrated defensiveness during economic and financial market stress, as they produce and sell goods that are considered essential, in the Consumer Staples and Health Care sectors, with a particular emphasis on cash flow stability and dividend yield. Within cyclical or economically-sensitive segments, the Fund maintains limited exposure and focused on special situation stocks in the Industrials sector and Natural Gas industry. The Fund's portfolio is designed to be relatively defensive with companies that have high barriers to entry. We continue to believe that our bottom-up focus, which allows flexibility and pragmatism to search for the best opportunities within the universe of large-capitalization equity securities, and tilting towards industries and sectors where we see the most opportunity, is most consistent with financial theory, empirical evidence, and the current environment.
