### How did the Fund perform during the reporting period?

The Horizon Active Asset Allocation Fund seeks to deliver capital appreciation by dynamically allocating across global equity markets, leveraging a flexible and diversified approach that is responsive to changing trends in global equities. For the year ending November 30, 2024, the Fund delivered on these expectations in terms of return and risk.

Global equity market performance was generally narrow and concentrated in U.S. large-cap growth stocks during the period. While the Fund maintained large allocations to this part of the global equity market during the period, the Fund's diversified approach was a headwind to performance as many international markets and much of the domestic equity universe underperformed capitalization-weighted market indices.

Key drivers of Fund performance included allocations to large-cap growth equities, which captured upside from outperforming sectors, and tactical adjustments to sector and domestic size exposures. Some of the Fund's tactical allocations to small-cap and value equities were also accretive to performance over the period, although the choppiness of trend changes were a headwind to the Fund's investment process. Exposure to international equities were the main detractors as those markets underperformed over the period.
